2. Communications received from Member States invoking the provisions of Article IV.C, paragraph 8(c), of the Constitution

The General Conference,
Having considered the communications received from Central African Republic, Georgia, Kyrgyzstan, Libya, Somalia, South Sudan and Tajikistan invoking the terms of Article IV.C, paragraph 8(c), of the Constitution in order to obtain permission to take part in the voting at its 38th session,
Recalling the constitutional obligation of Member States to pay their contributions fully and on time,
Taking into account the history of payment of contributions in preceding years and previous requests for voting rights in the case of each of these Member States, as well as the measures proposed by them to eliminate their arrears,

1. Considers that the failure of Central African Republic, Georgia, Kyrgyzstan, Libya, Somalia, South Sudan and Tajikistan to pay contributions for an amount exceeding the total due for the current year and the immediately preceding calendar year and/or instalments on payment plans is due to conditions beyond their control, and decides that these Member States may take part in the voting at its 38th session;
2. Also considers that the failure of Antigua and Barbuda, Comoros, Israel, Federated States of Micronesia, Sao Tome and Principe and the United States of America to pay contributions for an amount exceeding the total due for the current year and the immediately preceding calendar year and/or instalments on payment plans does not comply with the conditions laid down in Rule 82 of the Rules of Procedure of the General Conference, and decides in consequence that these Member States may not take part in the voting at its 38th session;
3. Invites the Director-General to report to the Executive Board at its 200th and 202nd sessions and to the General Conference at its 39th session on the actual position concerning all payment plans agreed upon between UNESCO and Member States in arrears with their contributions.

Resolution adopted at the 9th plenary meeting, on 9 November 2015.

VI Participation Programme and Fellowships Programme

The General Conference,

A – Participation Programme

I

1. Authorizes the Director-General to continue implementing, during the period 2016-2017, the Programme of Participation in the activities of Member States and the plan of action for the Fellowships programme, as approved in 37 C/Resolution 72 (paragraph 09000 of document 37 C/5 Approved) including the programmatic and budget adjustments approved by the present resolution, in accordance with the following principles and conditions:

A. Principles

1. The Participation Programme is one of the means employed by the Organization to achieve its objectives, through participation in activities carried out by Member States or Associate Members, or by territories, organizations or institutions, in its fields of competence. This participation is designed to strengthen the partnership between UNESCO and its Member States and make that partnership more effective through a sharing of contributions.

2. Under the Participation Programme, priority will be given to proposals submitted by least developed countries (LDCs), developing countries, post-conflict and post-disaster countries, small-island developing States (SIDS), countries in transition and middle-income countries.

3. Member States with high annual GDP per capita as established by the World Bank are invited to refrain from submitting requests.

4. Requests shall be submitted to the Director-General by the Member States through the National Commissions for UNESCO or, where there is no National Commission, through a designated government channel.

5. The projects or action plans submitted by the beneficiaries under the Participation Programme must relate to the priorities of the Organization, in particular to the major programmes, interdisciplinary projects, and activities to benefit Africa, youth and gender equality, as well as activities of the National Commissions for UNESCO with a specific reference to the paragraph of document 37 C/5 corresponding to the activity. It is understood that no financing will be provided for supplies and equipment which are not directly linked to operational works within the framework of these projects or for the recurrent costs of the beneficiary organizations.

6. Each Member State may submit seven requests or projects, which must be numbered in an indicative order of priority from one to seven. Requests or projects from national non-governmental organizations will be included in the quota submitted by each Member State.

7. The indicative order of priority laid down by the Member State may only be changed by the National Commission itself and before the start of the approval process. Member States must include at least one gender-equality project among their first four priorities.

8. International non-governmental organizations in an official partnership with UNESCO, of which the list is established by the Executive Board, may submit up to two requests under the Participation Programme for projects with subregional, regional or interregional impact, provided that their request is supported by at least the Member State where the project is to be implemented and another Member State concerned by the request. In the absence of supporting letters, no such requests may be considered.

9. Submissions:

   (a) requests should be submitted as soon as possible and no later than the following deadlines: 28 February 2014 for Africa, small island developing States (SIDS) and least developed countries (LDCs), and 31 August 2014 for all other eligible countries, except for requests for emergency assistance or a regional project, which may be submitted at any time in the biennium (equivalent deadlines will apply for the following financial cycle);
10. The Secretariat shall inform Member States of the receipt of their requests within 45 days of the deadlines of 28 February and 31 August of the corresponding years, and subsequently of the response by the Director-General to the requests as soon as possible.

11. **Beneficiaries.** Assistance under the Participation Programme may be accorded to:

   (a) Member States or Associate Members, upon request through their National Commissions or, where there is no National Commission, through a designated government channel, to promote activities of a national character. For activities of a subregional or interregional character, requests are submitted by the National Commissions of the Member States or Associate Members on whose territory they are to take place; these requests must be supported by at least two other National Commissions of participating Member States or Associate Members. For activities of a regional character, requests are limited to three per region and must be submitted by one Member State or a group of Member States. Such requests must be supported by at least three Member States (or Associate Members) concerned, and will not come within the quota of seven requests submitted by each Member State; they will be evaluated and screened by the Secretariat in accordance with the procedure established for the processing of requests submitted under the Participation Programme;

   (b) a non-self-governing or trust territory, upon the request of the National Commission of the Member State responsible for the conduct of the territory’s external relations;

   (c) international non-governmental organizations in an official partnership with UNESCO as defined in paragraph 8 above.

12. **Forms of assistance.** The applicant chooses the form of assistance, and may request either:

   (a) a financial contribution; or

   (b) implementation by UNESCO at Headquarters or in the field. In both cases, assistance may take the following forms:

      (i) the services of specialists and consultants, not including staff costs and administrative support;

      (ii) fellowships and study grants;

      (iii) publications, periodicals and documentation;

      (iv) equipment (for operational programme purposes in accordance with the list of benchmarks annexed to the Participation Programme circular letter of the Director-General sent at the beginning of each biennial budget cycle);

      (v) conferences, meetings, seminars and training courses; translation and interpretation services, participants’ travel costs, the services of consultants, and other services deemed necessary by all concerned (not including those of UNESCO staff members).

13. **Total amount of assistance.** Whichever of the above forms of assistance is requested, the total value of the assistance provided for each request shall not be in excess of $26,000 for a national project or activity, $35,000 for a subregional or interregional project or activity, and $46,000 for a regional project or activity. The financial provision made by the applicant must be sufficient to implement the activity satisfactorily. The activity must be executed and all funds disbursed in accordance with the Financial Regulations of the Organization. The expenditures must be made according to the distribution of the budget as approved by the Director-General and communicated to Member States in the letter of approval.

14. **Approval of requests.** When deciding upon a request, the Director-General shall take into account:

   (a) the total amount approved by the General Conference for the Participation Programme;

   (b) the assessment of the request made by the relevant sector(s);

   (c) the recommendation of the Intersectoral Committee on the Participation Programme chaired by the Assistant Director-General for External Relations and Public Information (ADG/ERI) and responsible for screening the Participation Programme requests, which are to be in conformity with the well-established criteria, procedures and priorities;

   (d) the contribution that such participation can effectively make to the attainment of Member States’ objectives in UNESCO’s fields of competence, and within the framework of the major priorities of the Medium-Term Strategy (C/4) and the Programme and Budget (C/5) approved by the General Conference, with which participation must be closely linked;

   (e) the need to establish an equitable balance in the distribution of funds, by giving priority to Africa, least developed countries (LDCs), gender equality and youth as well as developing countries and countries in transition and small island developing States (SIDS), which need to be mainstreamed throughout all programmes. In this regard, an appropriate selection criterion such as annual GDP per capita, established by the World Bank and/or the scale of assessment of Member States’ contributions to UNESCO, is to be considered by the Secretariat since, in general, the funds requested by Member States by far exceed those available. In addition, the Secretariat will establish the relevant financial ceilings, to be communicated to Member States, based on their status as LDCs, SIDS, developing countries or middle-income countries. Member States with high annual GDP per capita, as established by the World Bank, are invited to refrain from submitting requests;

   (f) the need to ensure that funding for each project approved is, as far as possible, allocated no later than 30 days before the date set for the start of the implementation of the project concerned, and in accordance with the conditions laid down in paragraph B.15(a).
15. **Implementation:**

(a) the Participation Programme will be implemented within the biennial programme of the Organization, of which it forms an integral part. The implementation of the activities set out in a request is the responsibility of the Member State or other applicant. The request submitted to the Director-General must show specific scheduled commencement and termination dates for the implementation of projects, cost estimates (in United States dollars) and promised or expected funding from the Member States or private institutions;

(b) the results of the Participation Programme will be made known with a view to the planning and implementation of the Organization’s future activities. The activity reports and sexennial reports, submitted after the completion of each project by Member States, will be used by the Secretariat to evaluate the Participation Programme’s impact and results in Member States and its consistency with the objectives and priorities set by UNESCO. An evaluation by the Secretariat may also be undertaken while the project is being carried out; the list of beneficiaries submitting reports late will be transmitted to the governing bodies;

(c) the use of UNESCO’s name and logo for the activities approved under the Participation Programme, in accordance with the directives approved by the governing bodies, will give this programme a higher profile when it is carried out at the national, subregional, regional or interregional levels, and the beneficiaries will report on the results recorded in this way.

**B. Conditions**

16. Assistance under the Participation Programme will be provided only if the applicant, when sending in the written requests to the Director-General, accepts the following conditions. The applicant shall:

(a) assume full financial and administrative responsibility for implementing the plans and programmes for which participation is provided; in the case of a financial contribution, submit to the Director-General, at the close of the project, an itemized statement accounting for the activities executed (financial report in United States dollars) and certifying that the funds allocated have been used for the implementation of the project, and return to UNESCO any balance not used for project purposes. This financial report must be submitted by 30 March 2016 at the latest. It is understood that no new financial contribution will be paid until the applicant has submitted all the requisite financial reports or returned the contributions paid out. The financial reports shall be signed by the competent authority and certified by the Secretary-General of the National Commission. Also, given the need for proper accountability, all the additional supporting documents necessary shall be kept by the applicant for a period of five years after the end of the biennium concerned and provided to UNESCO or the auditor upon written request. In certain exceptional cases or in unavoidable circumstances, the Director-General may decide on the most appropriate way to handle requests, in particular through implementation by a field office concerned, provided that she duly informs the Executive Board;

(b) undertake to provide on a compulsory basis, together with the financial report mentioned in subparagraph (a) above, a detailed activity report on the results of the projects financed and their usefulness for the Member State or States and UNESCO; in addition, a sexennial report on the impact of the Participation Programme shall be prepared by each beneficiary on a cycle aligned with the Medium-Term Strategy (C/4);

(c) pay, where participation is accorded in the form of study grants, the cost of the grantees’ passports, visas, medical examinations and salaries while they are abroad, if they are in receipt of a salary; help them to find suitable employment when they return to their countries of origin in accordance with national regulations;

(d) maintain and insure against all risks any property supplied by UNESCO, from the time of its arrival at the point of delivery;

(e) undertake to cover UNESCO against any claim or liability resulting from the activities provided for in this resolution, except where it is agreed by UNESCO and the National Commission of the Member State concerned that such claim or liability arises from gross negligence or wilful misconduct;

(f) grant to UNESCO, with regard to activities to be carried out in connection with the Participation Programme, the privileges and immunities set out in the 1947 Convention on the Privileges and Immunities of the Specialized Agencies.

**C. Emergency assistance**

17. **Criteria for according emergency assistance by UNESCO:**

(a) Emergency assistance may be accorded by UNESCO when:

(i) there are insurmountable circumstances nationwide (earthquakes, storms, cyclones, hurricanes, tornadoes, typhoons, landslides, volcanic eruptions, fires, droughts, floods or wars, etc.), which have catastrophic consequences for the Member State in the fields of education, science, culture or communication and which it cannot overcome on its own;

83 Scale of assessments and currency of Member States’ contributions

The General Conference,

Scale of assessments

Recalling Article IX of the Constitution,

Considering that the scale of assessments for Member States of UNESCO has always been based on that of the United Nations, subject to the adjustments necessitated by the difference in membership between the two organizations,

1. Resolves that:
   (a) the scale of assessments of Member States of UNESCO for the years 2016 and 2017 shall be calculated on the basis of the scale of assessment adopted by the United Nations General Assembly at its 70th session;
   (b) if the United Nations General Assembly revises the scale for 2017 at a later session, the revised scale will be adopted by UNESCO accordingly;
   (c) new Member States and Associate Members depositing their instruments of ratification after 5 November 2015 shall be assessed in accordance with the formula set forth in 26 C/Resolution 23.1;

Currency of assessment and payment of contributions

Having examined the report of the Director-General on the currency of contributions of Member States (38 C/37), Recalling Article 5.6 of the Financial Regulations, Conscious of the need to reduce the exposure of the Organization to adverse currency fluctuation during 2016-2017,

1. Resolves, in respect of contributions for the years 2016 and 2017, that:
   (a) contributions to the budget shall be assessed as follows:
      (i) in euros: 47% of the budget financed by assessed contributions and calculated at the constant rate of $1 equal to 0.869 euros;
      (ii) in United States dollars – the remaining 53% of the amount of contributions to be paid by Member States;
   (b) contributions shall be paid in the two currencies in which they are assessed; nevertheless payment of the amount assessed in one currency may be made, at the choice of the Member State, in the other currency of assessment; unless the amounts assessed are received simultaneously and in full in the currencies in which they are assessed, credit shall be given against contributions due in proportion to the amounts assessed in both currencies using the United Nations operational rate of exchange at the date of receipt;
   (c) contributions assessed in euros that remain unpaid at the end of the biennium shall be considered as due and payable in United States dollars thereafter, and for this purpose shall be converted into United States dollars using the most beneficial rate to the Organization, by reference to the following four options:
      (i) the constant rate of exchange used to calculate the euro portion of assessed contributions for the biennium;
      (ii) the average United Nations operational rate of exchange for the euro during the biennium;
      (iii) the United Nations operational rate of exchange for the euro applicable in January of each year of the biennium;
      (iv) the United Nations operational rate of exchange for the euro applicable in December of the second year of the biennium;
   (d) when contributions are received in advance in euros for subsequent financial periods, such advance payment shall be converted into United States dollars using the United Nations operational rate of exchange at the date of receipt;

Considering nevertheless that Member States may find it desirable to discharge part of their contributions in the currency of their choice,

2. Also resolves that:
   (a) the Director-General is authorized, upon request from a Member State, to accept payment in currencies other than the United States dollar or the euro if she considers that there is a foreseeable need for that currency;
   (b) acceptance of currencies other than the United States dollar or the euro is subject to the following conditions:
      (i) currencies so accepted must be usable, without further negotiation, within the exchange regulations of the country concerned, for meeting all expenditure incurred by UNESCO in that country;
      (ii) amounts received in other currencies shall be converted into United States dollars, either at the rate which UNESCO can obtain on the market for conversion of the currency in question into United States dollars on the market, or at the United Nations operational rate of exchange on the date of receipt, whichever is more beneficial to the Organization;

3. Further resolves that any differences due to variations in the rates of exchange or to bank charges not exceeding $100 relating to the last payment against contributions due for a particular year in question, shall be posted to the profit and loss account.

Resolution adopted on the report of the APX Commission at the 13th plenary meeting, on 13 November 2015.

3. Supports the approaches the Director-General is continuing to make with a view to obtaining timely payment of contributions;

Concerned by the financial situation of the Organization as a result of the non-payment of assessed contributions by Member States and the severe implications thereof for the delivery of regular programme activities and for the Organization’s reliance on extrabudgetary funding sources,

4. Urgently appeals to those Member States that are behind with the payment of their contributions to pay their arrears without delay and, where appropriate, to settle their outstanding annual instalments at the earliest possible time as well as their regular assessed contributions;
5. Notes in particular the failure of 13 Member States to pay on time the amounts due by them against payment plans approved by the General Conference for settlement of their accumulated arrears in annual instalments,
6. Urges Member States, on receipt of the Director-General’s request for payment of assessed contributions, to inform her, as promptly as possible, of the probable date, amount and method of payment of the forthcoming contribution in order to facilitate her management of the Organization’s treasury function;

7. Also urgently appeals to those Member States that are behind with the payment of their regular contributions, mandatory advances to the Working Capital Fund, and instalments under payment plans to pay their arrears without delay, bearing in mind:
   (a) the risk of loss of voting rights at the sessions of the General Conference;
   (b) that prompt payment will enable the Organization to sustain its programmes and plan the budget for its 2016-2017 biennium in rational fashion.

5. Requests the Director-General to support Member States in their efforts to compile reports on the implementation of the 1970 Convention or on the means of becoming Parties to it;

6. Also requests the Director-General to transmit it, at its 39th session, a report of the Subsidiary Committee of the Meeting of the States Parties on its activities.

ITEM 3.4 – PREPARATION OF THE DRAFT PROGRAMME AND BUDGET FOR 2018-2021 (39 C/5)

SUMMARY OF SC COMMISSION’S DEBATE

1. An introduction was provided by the Director of Programme and Budget for the Bureau of Strategic Planning, the Assistant Director-General for Natural Sciences and the Assistant Director-General and Executive Secretary of the Intergovernmental Oceanographic Commission (IOC).

2. During the debate, 42 delegates took the floor.

Science: key for implementing the 2030 Agenda for Sustainable Development

3. A majority of Member States emphasized that the 2030 Agenda for Sustainable Development should serve as a compass for the work in UNESCO Natural Sciences, particularly in the areas where a comparative advantage exists, namely in oceans, fresh water and biodiversity as well as through the intersectoral nature of the Organization, both between science programmes and with social sciences and education.

4. Several speakers expressed their satisfaction that UNESCO, notably through its intergovernmental and international scientific programmes, has taken on a leading role in the preparation of the 2030 Agenda for Sustainable Development, and underscored that UNESCO was well-positioned to continue to play a key role within the new framework. In particular, cross-cutting issues such as climate change, science education, natural resource management and disaster risk reduction were raised. Several delegates noted the importance of science, technology and innovation (STI) in achieving the Sustainable Development Goals (SDGs). It was indicated that a review and rebalance of science priorities may be required.

5. Many delegates emphasized the importance of IOC and the necessity to continue to prioritize IOC in future programme and budgets, in particular the need to strengthen the IOC sub commissions for Africa and for Latin America and the Caribbean. They highlighted the importance of tsunami warning systems and capacity building in the ocean sciences. One Member State requested that the role and governance mechanisms of IOC be clarified.

6. Many speakers raised the importance of International Hydrological Programme’s (IHP) work relating to integrated water resources management and water security.

7. Member States recognized the relevance of Biosphere Reserves and the work of the Man and the Biosphere (MAB) Programme relating to conserving biodiversity, forestry, and transboundary biosphere reserves.

8. Global Geoparks were also mentioned as an area on which the sector should focus, especially within the proposed revitalized International Geosciences and Geoparks Programme (IGGP).

9. A number of delegates, in particular from Africa, highlighted the importance of science technology and innovation in ensuring sustainable development. Interventions supported basic and engineering sciences as well as strengthened STI policy work, recognizing the essential role of efficient science systems to address the 2030 Agenda for Sustainable Development. There should be a greater focus on research and innovation, scientific data and training. The UNESCO Institute for Statistics was mentioned by a few countries who highlighted its role in monitoring and reporting on achievement of SDGs.

Enhancing interdisciplinary and intersectoral cooperation

10. A number of countries stressed the importance of the Natural Sciences Sector to work in an interdisciplinary way, in particular with the social sciences. Various delegates highlighted the importance for UNESCO to focus on sustainability science.

11. They also recommended taking advantage of the many strong networks such as category 1 and 2 centres, Chairs, and partners to multiply UNESCO’s Major Programme II impact.

12. Member States appreciated UNESCO’s support to the United Nations Secretary-General’s Scientific Advisory Board.

13. Various delegates underscored the important work UNESCO was undertaking in the area of climate change, including through IOC, and in the area of disaster risk reduction.

14. Particular focus on intersectoral cooperation should be paid while drafting the implementation plan for the UNESCO Small Island Development States action plan.

Strengthening science education with a focus on youth, in particular girls

15. In particular, there is a need to focus on science, technology, engineering and mathematics (STEM) in teacher training to address the shortage of teachers with a broad science knowledge. Furthermore, more effort should be made to inspire youth, in particular girls, to pursue scientific studies.

16. Local and Indigenous Knowledge Systems (LINKS), youth, and gender were mentioned as important priorities to be mainstreamed and strengthened in all the work of Major Programme II. Specific strategies are needed to engage with and include these groups.

Implementing the SDGs on the ground

17. Delegates were particularly eager that the Organization assist with implementing SDGs on the ground to meet national priorities. Some delegates felt the Organization could be more efficient and strategic in delivering on the SDGs through the Major Programme II activities. A number of interventions requested to reinforce UNESCO’s presence in the field.

18. Interagency coordination and collaboration should be further improved to ensure a successful implementation of the SDGs, taking into account needs and priorities at the country level.
19. In their reply to the debate, ADG/SC and ADG/IOC thanked the Member States for their positive comments and took note of the suggestions made by Member States to ensure UNESCO plays a key role in the 2030 Agenda for Sustainable Development.

Developed through consultation between the Chairs

(Paris, 2 November 2015)

At the last General Conference we welcomed the role identified for UNESCO in the Medium-Term Strategy for harnessing science for sustainable development, including strengthening the science-policy-society interface within the context of the post-2015 development agenda. Today we can look with satisfaction to many developments that emanated from this role over the past two years.

Science, technology and innovation (STI) are cross-cutting themes underpinning all 17 Sustainable Development Goals (SDGs). We wish to thank the Scientific Advisory Board (SAB) of the United Nations Secretary-General, for their role in making this a reality, and we remind that the ISP worked with UNESCO to nominate the outstanding Board members. The approved 2030 Agenda for Sustainable Development affirms the suggestions the ISP made over these years and we can be proud of our role in ensuring in particular two of the SDGs. The IHP is clearly linked to Goal 6, “Ensure availability and sustainable management of water and sanitation for all”, and most of its targets. The IOC is clearly linked to Goal 14, “Conserve and sustainably use the oceans, seas and marine resources for sustainable development” and several of its targets.

More broadly, the ISP, both individually and jointly can and will make contributions to the SDGs. We will support UNESCO Member States that seek assistance in the areas of our competence.

We would like to outline some of our future aspirations concerning how we can accomplish this.

International Basic Sciences Programme (IBSP)

The basic sciences are behind all application and innovation and drive development of new technologies which improve human well-being and environmental quality. This is why science education and building a scientific enterprise in all countries, including the least developed countries, is fundamental. This is part of the IBSP’s role. The IBSP has recently focused on two areas, green chemistry and the 2015 International Year of Light and Light-Based Technologies, both of which support sustainable development, in particular making cities more liveable, reducing consumption and production, supporting renewable energy and reducing the emissions of greenhouse gases while improving human health. IBSP’s work in STI plays a specific role in Goal 9, target 9.5; Goal 12, target 12.a; and Goal 17, target 17.6. IBSP joins all others for whom ensuring a range of options for clean, sustainable development for the future of humanity is a priority.

International Geoscience Programme (IGCP)

The Earth sciences now have a critical role to play in understanding how the Earth systems will continue to change under a dynamic climate regime, based on the geologic record and interdisciplinary approaches, as well as to how the Earth systems can be managed to mitigate this change. At the same time, the use of geological resources, namely hydrocarbons, is the origin of human-induced climate change. As the only United Nations agency with a mandate in the geological sciences, UNESCO’s IGCP continues to play a critical role in encouraging international cooperation to better understand and manage our Earth’s resources and changing systems in the future. IGCP projects are required to communicate science outcomes to the general public and particularly youth. In climate research, IHP and IGCP are collaborating on an IGCP project to understand past and future changes of glaciers in Central Asia.

With the joining of a proposed International Geoscience and Geoparks Programme being discussed during this General Conference, the Earth sciences at UNESCO can expand opportunities to communicate frontline research into geological education at all levels as well as to strengthen sustainable tourism programmes, as prioritized in Goals 4, 12 and 16.

International Hydrological Programme (IHP)

In the context of current and future global changes, in particular those related to climate, the economy and demographics, as well as the implementation of the 2030 Agenda for Sustainable Development, dedicated water Goal 6, and related Goals 11, 12, 13 and 15, IHP strives to ensure water security through its Eighth Phase (IHP-VIII), covering key aspects such as water quantity, accessibility and quality. IHP supports international cooperation and a science-based approach to increase knowledge, understanding and assessment of the physical, social, economic and environmental aspects of water challenges, which is essential for the development of adequate policies and to develop sound solutions to pervasive, vital issues. IHP supports the development of a comprehensive long-term, holistic strategy related to water research, governance and management to predict and manage the impact of changing hydrological extremes, in particular to strengthen disaster risk management capability; to protect water resources; and to provide water services using intelligent and affordable technologies of interest in particular in developing countries, with a priority focus on Africa.
Man and the Biosphere Programme (MAB)

MAB and its World Network of Biosphere Reserves, consisting of 651 terrestrial and coastal/marine ecosystems from 120 Member States, covering over 617 million hectares of planet earth and more than 170 million local and indigenous peoples who are under very diverse development contexts, make it possible to connect Goal 15, on “life on land” at community level with Goals 1 and 2 on poverty and food security, 6 on freshwater, 11 on cities, 12 on sustainable consumption and 13 and 14 on climate change and oceans, respectively. The MAB Strategy 2015-2025 to be endorsed at this session of the General Conference and the Global MAB Action Plan to be launched at the Lima World Congress of Biosphere Reserves in March 2016, will ensure joint actions with all UNESCO ISP to sustain biodiversity, restore ecosystem functions and services, address climate change and its impacts, create new green development opportunities and promote the application of sustainability science.

Management of Social Transformations Programme (MOST)

By means of its Forums of Ministers of Social Development, its MOST Schools and national committees, the MOST Programme has been encouraging positive social transformations for over 20 years in countries around the world in poverty eradication, social inclusion, reduction of inequalities, gender equality, promotion of peaceful, just and inclusive societies as well as tackling the social effects of climate change. The MOST Programme is thus in an outstanding position to make significant contributions to the achievement of SDGs 1, 8, 10, 11 and 16 which will require tailored evidence-based policies. This involvement reflects UNESCO’s enduring commitment to universal standards enshrined in the Agenda, including the transversality of an approach that should “leave no one behind”.

In order to prepare the upcoming activities of MOST, the General Conference has been asked to consider the implementation of a new comprehensive strategy for the Programme as well as to further discuss its role in achieving the SDGs by disseminating its experience and encouraging the establishment of local MOST committees.

Intergovernmental Oceanographic Commission (IOC)

The IOC, as the United Nations ocean science body, will contribute to building the science base for coastal and ocean management as well as warning systems for hazards generated at sea. Sustaining ocean observations and science will be essential to better understand and assess the role and potential value of healthy marine and coastal ecosystems, and these are therefore critical means of implementation for achieving the ocean goal. To ensure that Member States derive benefits from the ocean in a sustainable way and based on the best available science, IOC will also provide a global platform for building capacities through science facilitation in accordance with its guidelines on transfer of marine technology.

Climate variability and change impact many elements on which human well-being depends, modifying patterns of rainfall and drought, sea-level and coastal erosion, and through temperature changes and ocean acidification, adding stress to ecosystems and impacting on the goods and services they provide. To fully comprehend this ocean-climate nexus, IOC will assist its Member States in developing capacity and build the knowledge base so as to enable them to develop and improve climate impact mitigation and adaptation strategies. In particular, IOC will continue to work with IHP and MAB, respectively, in the assessment and management of coastal aquifers, sea-water intrusion and interactions across transboundary water systems; and the implementation of ecosystem based management tools to protect and conserve marine and coastal biodiversity.

In conclusion, we the Chairs of the ISP, agree to:

Continue our support to the Director-General in her efforts to reinforce the role of the sciences within UNESCO and in the broader international community, including in collaboration with the SAB, and with international and intergovernmental science bodies beyond UNESCO, including IPBES, IPCC and Future Earth. We will continue to promote awareness of the roles of the ISP and of UNESCO in bringing frontline scientific research to the public that will insure promotion of independent and sustainable thinking and action fostered within the United Nations System to deliver on the goals set by the 2030 Agenda for Sustainable Development.

We will continue to seek joint extrabudgetary funding from major environmental donors and we welcome UNESCO’s Fit for Purpose exercise within the context of the United Nations’ initiative of this name, as it will ensure UNESCO is well-regarded by the donor community.

We count on the full support of UNESCO Member States to ensure we can fulfil our expected roles under the new global agenda by considering the real priority of the sciences, from education and capacity building, to policy advice and international research support.

1. At its first meeting, on 10 November 2015, the Social and Human Sciences (SHS) Commission examined item 3.4 – Preparation of the Draft Programme and Budget for 2018-2021 (39 C/5).

2. The Assistant Director-General set out the vision and strategic thrust of the SHS programme for the coming years. She highlighted the importance of the Commission’s support work in the discussion on the strengthening and reorienting of the SHS programme, particularly in response to the challenges of the 2030 Agenda for Sustainable Development. She stressed that the flagship programmes under consideration within that framework needed to be more in step with national needs and priorities, more coordinated, effective and transparent in their implementation, and better coordinated with various programme sectors, as well as with other United Nations agencies and UNESCO’s networks of experts. She also underscored the need for a more strategic approach to communication, to mobilizing additional resources and to partnership in order to make the best use of the available human and financial means.

3. The representatives of 28 Member States and one Observer took the floor during the discussions.

Relevance of UNESCO’s mandate in the field of social and human sciences to meet the challenges of the Sustainable Development Goals (SDGs)

4. Appreciation was expressed for the strategic analysis of the Sustainable Development Goals (SDGs), particularly the clarity it provided vis-à-vis UNESCO’s comparative advantage in general, and the leading role of the social and human sciences in responding to the challenges posed by our changing societies.

5. Several Member States expressed their concerns in the face of an international context of multiple crises and the societal challenges in urgent need of attention at the local, regional and global levels. Consequently, they regarded the adoption of the 2030 Agenda for Sustainable Development as an opportunity, providing an ambitious new strategic framework, and recalled the overriding need for social and human science programmes to be more firmly established in order to contribute more effectively.

Flagship programmes more focused on priorities

6. The Commission stressed the need to respond to the various increasingly urgent challenges, such as social inclusion, migration crises, discrimination and intolerance, urban development, intercultural dialogue, gender equality, bioethics and the ethics of science and technology.

7. Reiterating the importance of the work done by the Social and Human Sciences Sector in this field, Member States called for the status of the Sector to be strengthened and enhanced to enable it to contribute fully to UNESCO’s role as a laboratory of ideas and to provide an effective and strategic response to the various challenges of direct concern to it. A human rights-based approach was recommended for understanding the issues and finding solutions to crucial challenges.

8. The importance of flagship programmes such as the Management of Social Transformations (MOST) was strongly emphasized, especially for implementing the SDGs in which this programme had a key role, as it was at the interface of research, policy and action. The process of developing a new strategy for MOST was therefore noted with much interest as a means of upgrading and modernizing the programme in order to enlist researchers in every region more actively, and to ensure closer cooperation at all levels in developing public policy based on empirical facts.

9. Some Member States alluded to the contribution made by science and technology to sustainable development and the role that the Social and Human Sciences Sector should continue to play, for both standard-setting and programmes, in supporting reflection on bioethics and the ethics of science and technology. Equitable distribution of scientific developments and its applications was highlighted as a prerequisite for strengthening the capacity of Member States and ensuring sustainable development and lasting peace.

10. The role of physical education and sport as a medium for promoting the values of inclusion, tolerance and respect was reasserted and their contribution to developing more peaceful societies was highlighted. The Organization’s promotion of integrity in sport was recognized, together with its standard-setting work in action to combat doping and to encourage the emergence of better sports governance at the global level.

11. During the discussions particular attention was paid to youth and the involvement of young people. A number of speakers welcomed the success of the 9th UNESCO Youth Forum and the results achieved in that consultation process on key issues such as the goals for achieving sustainable development by 2030 and climate change. Some speakers also expressed the wish to see the Forum in a format that would give greater voice to young people, particularly those from the least developed countries (LDCs) and small island developing States (SIDS). One Member State recommended that the conclusions of the Youth Forum should in future be the subject of a specific debate on the agenda of the General Conference so that their recommendations would be better taken into account.

12. Several speakers referred to the work of UNESCO to promote a culture of peace and for the close link between peace and sustainable development to be better taken into account. The need for UNESCO to further promote mutual understanding through intercultural dialogue in order to cope with and prevent the rise of violence, intolerance and extremism was reaffirmed. Many Member States noted the favourable context offered by the International Decade for the Rapprochement of Cultures (2013-2022), calling for an effort to capitalize more on the various initiatives undertaken within that framework.
Global priorities, strengthening intersectorality and developing partnerships

13. Member States recalled the importance of the global priorities of gender equality and Africa. They stressed the need to mainstream those priorities into all the Organization’s activities and emphasized, in respect of social and human sciences, the need for more relevant indicators.

14. The interdisciplinary approach offered by the social and human sciences was mentioned by several Member States, with a view to proposing innovative solutions within the framework of UNESCO’s mandate. Member States recommended a more intersectoral and integrated approach in the implementation of programmes, underpinned by the Organization’s various fields of competence, such as the complementarity between the Social and Human Sciences and Natural Sciences Sectors that was needed to tackle more effectively the social issues associated with climate change and poverty eradication.

15. Member States also stressed the need for stronger cooperation with other stakeholders, such as UNESCO Chairs, the International Coalition of Cities against Racism, United Nations agencies and other intergovernmental bodies, and various research networks, centres and institutes.

16. In response to the debate, the Assistant Director-General for Social and Human Sciences thanked the Member States for their positive comments and took note of their suggestions for ensuring a key role for UNESCO in the 2030 Agenda for Sustainable Development.

ANNEX

SUMMARY OF THE CLT COMMISSION DEBATE ON ITEM 3.4 – PREPARATION OF THE PROGRAMME AND BUDGET FOR 2018-2021 (39 C/5)

1. A total of 28 Member States and two Observers participated in this debate.

2. The 2030 Agenda for Sustainable Development, the need to respond to emergency situations when heritage and the diversity of cultural expressions are put at risk and the standard-setting instruments of UNESCO in the field of culture were the 3 main points highlighted by the delegations which participated in the debate. Cultural diversity, youth, gender, and the need for greater intersectoral cooperation especially in the area of education, in particular as concerns cultural heritage, were among the other issues highlighted by a large number of delegations.

3. Almost all delegations highlighted the importance of aligning the priorities of Major Programme IV – Culture with the 2030 Agenda for Sustainable Development which should be considered as an overarching framework of all UNESCO activities including those related to culture. Most delegations emphasized more specifically the importance of culture having been included for the first time in the international development agenda, with specific entry points in 9 of the Sustainable Development Goals (SDGs) as well as culture’s role as an enabler and as a driver for sustainable development. Furthermore, the overwhelming majority of delegations also highlighted the significance of UNESCO’s Culture Conventions not only as crucially important standard-setting instruments but also as key tools for achieving the SDGs and for preventing the destruction of cultural and natural heritage in conflict and emergency situations. The role of UNESCO in emergency situations was frequently underscored, as well as the need to protect and promote cultural diversity. The Commission also emphasized the importance of Youth at the core of the UNESCO’s actions towards achievement of the SDGs; as well as the importance to continue mainstream gender equality in all culture programmes. The need for enhancing synergies between UNESCO Conventions as well as between major programmes was another recurrent theme.

4. The summary of this debate has taken into account the major subjects raised by the speakers and the comments of the Executive Board contained in document 38 C/7.

**Culture in the 2030 Agenda for Sustainable Development**

5. The Commission highlighted the strategic role of culture in contributing to the implementation of the SDGs. UNESCO’s unique mandate in the field of culture and its standard setting role were considered to be an important comparative advantage.

6. Almost all Member States underscored the need for the 2030 Agenda for Sustainable Development to guide the preparation of the next programme and budget. The statutory work of the Sector, with its standard-setting instruments, has a very important role to play in achieving the SDGs and should be articulated accordingly in the 39C/5. Particular attention should be given to the sustainable development of cities and urban areas in all fields of work of the Culture Sector.

7. A number of delegations emphasized the need for reliable cultural statistics and indicators for monitoring the 2030 Agenda for Sustainable Development.

**Emergencies**

8. UNESCO’s leadership in the response to the unprecedented attacks to culture, namely throughout the integration of culture in humanitarian operations was highly commended. Many delegations welcomed the proposal for a Strategy for the reinforcement of UNESCO’s action for the protection of culture and the promotion of cultural pluralism in the event of armed conflict.

9. Many speakers stressed that efforts to protect and promote cultural diversity and the diversity of cultural expressions should be further enhanced, permeating all actions and activities related to conflict situations. The fight against the illicit trafficking of cultural property and is an essential part of this work.

10. The Commission universally welcomed the UNESCO “#United4Heritage” campaign, which aims at mobilising young people across the world to protect cultural heritage and prevent its destruction.

**Culture Conventions**

11. Almost all delegations stressed that UNESCO’s Culture Conventions are its comparative advantage in Member States’ work to achieve the SDGs and excellent tools for promoting international cooperation and solidarity in building peaceful and inclusive societies.

12. Delegations insisted on the utmost importance of the statutory work of the Sector and highlighted that it should not be seen as separate from the priorities of the 2030 Agenda for Sustainable Development, but rather considered as a major tool of UNESCO’s work towards achieving the Sustainable Development Goals (SDGs). The effective implementation of the culture conventions, including assistance to Member States through awareness raising, education programmes, capacity building, periodic reporting and technical assistance mechanisms is seen as crucial.

13. At the same time, a vast majority of delegations acknowledged the lack of financial and human resources as one of the major challenges in the implementation of the culture conventions and called for further synergies and coordination among convention secretariats, referring to the recommendations emanating from the evaluation of the Culture Sector’s standard setting work. Ensuring synergies through harmonising periodic reporting exercises of the different conventions was particularly highlighted by a number of interventions.

14. Developing further synergies between UNESCO Culture conventions and other conventions and standard-setting instruments related to natural heritage and biodiversity was specifically stressed by some delegations.
Intersectoral cooperation

15. Delegations acknowledged the central role of intersectoral cooperation in delivering the Expected Results of Major Programme IV, and particularly encouraged collaboration with the Education Sector on Global Citizenship Education and Cultural Diversity; with the Social and Human Sciences Sector on the Silk Roads Project; between the Natural Sciences Sector and the World Heritage Centre as well as with UNESCO Institute of Statistics (UIS) on Cultural Statistics.

16. Member States also called for strengthened South-South and North-South-South cooperation, through partnerships and collaboration with other United Nations Agencies, regional integration organizations, UNESCO Networks and Chairs, category 2 centres as well as with the private sector.

Youth

17. Almost without exception, delegations insisted that youth should continue to be even more in the heart of the Sectors’ activities in a transversal manner between culture, education, science and communication.

18. UNESCO’s comparative advantage in the field of education and culture was repeatedly highlighted by the Commission. Member States called for the inclusion of culture at the core of the education systems through educational programmes to promote heritage values, intercultural dialogue and to prevent the radicalization of youth.

19. Member States also urged the participation of youth in the formulation of cultural policies at local, national and international level should be reinforced. The role of youth was understood as essential to ensure more inclusive and sustainable societies.

Gender

20. The Commission underlined the need to mainstream Gender equality and Women’s empowerment through all activities of the Sector.

ITEM 3.4 – PREPARATION OF THE DRAFT PROGRAMME AND BUDGET FOR 2018-2021 (39 C/5)

ITEM 4.5 – CONCLUSIONS OF THE YOUTH FORUM

SUMMARY OF CI COMMISSION’S DEBATE

1. The Communication and Information (CI) Commission dedicated its first debate to the Preparation of the Draft Programme and Budget for 2018-2021 (39 C/5) as well as to the consideration of the conclusions of the 9th UNESCO Youth Forum.

2. In his introductory remarks, the representative of the Director-General, the Deputy Director-General, highlighted selected achievements as foundations for CI’s future work. He underlined the impact of UNESCO’s intersectoral work on the World Summit on the Information Society and stressed the increasing importance that freedom of expression is taking on as a human right both online and offline. The United Nations Plan of Action on the Safety of Journalists, the development of Open Access activities in Member States, as well as UNESCO’s promotion of multilingualism and universal access to cyberspace are also key pillars for future action. The Deputy Director-General (DDG) moreover emphasized UNESCO’s key role in the work on ICTs for persons with disabilities, and how the gender equality and Africa global priorities continue to be excellent foundations for future activities.

3. Quoting the Knowledge Societies reference in the 2030 Agenda for Sustainable Development, the Deputy Director-General (DDG) also emphasized the CI Sector’s role in contributing to the achievement of the Sustainable Development Goals.

4. The representative from the Bureau of Strategic Planning (BSP) informed Member States on the consultative process concerning the preparation of the future Programme and Budget for 2018-2021 (39 C/5), which will lead to its adoption at the 39th General Conference in 2017.

5. Two youth representatives presented the Commission with a selection of action recommendations issued by the 9th UNESCO Youth Forum. Among them were the creation of an innovative toolkit on global citizenship education to ensure the universal enjoyment of human rights, the setting up of youth foresight forums and the establishment of a global environment youth organization fostering learning through a virtual university. While these recommendations are not part of the C/5 document, a number of Member States voiced their support to these initiatives during the ensuing debate for their implementation at country level.

6. All Members States stressed the importance and quality of the work carried out by the Sector and the related Memory of World (MoW) and the Information For All Programme (IFAP), as well as the International Programme for the Development of Communication (IPDC). They agreed that UNESCO was uniquely positioned to contribute to the 2030 Agenda for Sustainable Development, notably as communication, information and related technologies serve as cross-cutting enablers of all areas of UNESCO’s mandate. They are equally crucial enablers for the realization of the interrelated Sustainable Development Goals (SDGs).

7. Many Member States voiced concerns about the budget allocation to MP V in relation to the ubiquitous role of communication and information in the digital era and for development. The need for additional financial resources and prioritization of activities along UNESCO’s comparative advantages was stressed, emphasizing UNESCO’s normative and conceptual leadership as well as its strong convening power through multi-stakeholder platforms. Member States also expressed their will to see vacant posts staffed as soon as possible, notably in field offices.

8. The universality of human rights both off-line and online was recalled. So were the principles summarized by the acronym ROAM which underscores that the Internet should be (1) Human Rights-based, (2) Open, (3) Accessible to all, and (4) nurtured by Multi-Stakeholder participation. Delegations highlighted UNESCO’s outstanding multi-stakeholder consultation process for the Internet Study and the conference CONNECTing the Dots, which finalized options for future action for UNESCO.

9. Inclusion being a foundation of knowledge societies, UNESCO was urged to continue to promote gender equality and to create opportunities for women, youth, people with disabilities and to help close the digital and knowledge divides.

10. Strong emphasis was also placed on the importance of freedom of expression and press freedom, with specific references made to media pluralism, independence and strengthening journalists’ skills and capacities. The central importance of ensuring the safety of journalists was raised by many, not least through continued strengthening of UNESCO’s leadership on the United Nations Plan of Action on the Safety of Journalists and the Issue of Impunity.

11. The continued promotion of these principles and the importance of media and information literacy, ethics, and the promotion of access to knowledge, as well as cultural understanding and tolerance, were underlined as key for UNESCO’s future work. Many delegations noted the challenges of countering hate speech, radicalization and violent extremism. Member States thanked UNESCO for the work done in this area and encouraged CI’s future work in this field.

12. UNESCO was urged to further leverage the intersectoral nature of its mandate and CI’s catalysing, cross-cutting role was emphasized.

13. In response, the Deputy Director-General thanked Member States for their support to the CI Sector. He stressed the necessity to fulfill ambitions to support Member States to achieve the cross-cutting implementation of the Sustainable Development Goals (SDGs) in their own respective contexts.

INTRODUCTION

1. The joint meeting of the programme commissions and the APX Commission, referred to below as “the joint meeting of commissions”, took place on 4 (afternoon) and 18 November 2015 (morning), in the presence of the five Chairpersons of the programme commissions and the Chairperson of the APX Commission.

2. Mr Matthew Sudders (United Kingdom of Great Britain and Northern Ireland), Chairperson of the APX Commission, chaired the examination of the three (3) items on the agenda of the joint meeting of commissions.

3. The joint meeting of commissions adopted the timetable of work submitted in document 38 C/COM.JM/1 Prov.

Item 3.3 Adoption of the Appropriation Resolution for 2016-2017

4. The joint meeting of commissions examined item 3.3 at its second and last meeting. The recommendation of the joint meeting of commissions is contained in 38 C/Resolution 103.

Item 3.4 Preparation of the Draft Programme and Budget for 2018-2021 (39 C/5)

5. The joint meeting of commissions examined this item at its second meeting. Following the debate, the joint meeting of commissions recommended that the General Conference adopt the resolution proposed in document 38 C/7. (38 C/Resolution 104)

Item 3.5 Adoption of the provisional budget ceiling

6. The joint meeting of commissions examined item 3.5 at its first meeting. The joint meeting of commissions recommended that the General Conference endorse the $667 million budget ceiling for the 2016-2017 biennium, comprising $653 million of assessed contributions, as well as $14 million additional appropriation; and the $518 million expenditure plan based on an expected cash flow for 2016-2017.

7. The recommendation of the joint meeting of commissions is contained in the two first paragraphs of paragraph 18 of 196 EX/Decision 15, as contained in document 38 C/6. The resolution reads as follows:

The General Conference,

Having examined document 38 C/5 Draft presented by the Director-General,

1. Approves a budget ceiling of $667 million for the 2016-2017 biennium, comprising $653 million of assessed contributions as well as $14 million additional appropriations taken from the unspent balance of Part V of document 37 C/5 Approved and the unspent balance of the Special Emergency Multi-Donor Fund for UNESCO Priority Programmes and Reform Initiatives;

2. Also approves the expenditure plan based on an expected cash flow for 2016-2017 of $518 million, comprising $507 million of assessed contributions as well as $11 million additional appropriations taken from the unspent balance of Part V of document 37 C/5 Approved and the unspent balance of the Special Emergency Multi-donor Fund for UNESCO Priority Programmes and Reform Initiatives;

Excerpt of the oral report of the Chairperson of the Joint Meeting of Commissions (38 C/INF/26)
as delivered to the General Conference on Wednesday, 18 November 2015

(…)

Following the adoption of the relevant parts of the 38 C/6 and 38 C/6 Addendum by each programme commission, Members adopted these documents in their entirety after having taken into account the structural adjustments that had been proposed by the Director-General at the last 197th session of the Executive Board and as reflected in document 38 C/INF.17 and Corr.

These adjustments related only to budget transfers from one line to another within Major Programmes; between Culture (CLT) and Social and Human Sciences (SHS), from Bureau of Strategic Planning (BSP) to a newly created “Field Support and Coordination” service. The changes did not impact the overall budget envelope.

(…)

Before the final adoption, the Joint Commission was reminded that by approving the Appropriation Resolution and its revised appropriation table which includes the Director-General’s proposed structural adjustments, the Joint Commission would also be adopting the recommendations of Executive Board contained in document 38 C/6 and Add., in particular concerning the fact that the balance of the Emergency Fund would go to fund the Zero Nominal Growth Plus ceiling, and that any remaining balance of the Emergency Fund would go to the “Invest for Efficient Delivery Fund”, in particular within paragraph 18, sub-paragraph 8,9, 10 of 38 C/6.

H. Reports of the Legal Committee

First report
The Legal Committee elected by acclamation Mr Pierre Michel Eisemann (France) as Chairperson, Mr Sirajuddin Hamid Yousif (Sudan) as Vice-Chairperson and Mr Klaus Hüfner (Germany) as Rapporteur.

EXAMINATION OF COMMUNICATIONS ON THE ADMISSIBILITY OF DRAFT RESOLUTIONS PROPOSING THE ADOPTION OF AMENDMENTS TO THE DRAFT BUDGET FOR 2016-2017 (38 C/5)

1. Since its 29th session, the General Conference has adopted a procedure for processing draft resolutions proposing amendments to the Draft Programme and Budget. This procedure derives from an amendment introduced into its Rules of Procedures (see Rules 79 and 80).

2. The procedure established provides that the sponsors of those draft resolutions (DR) that at first sight appear inadmissible in the opinion of the Director-General may appeal to the General Conference, after submission to the Legal Committee, to rule at last instance on their admissibility.

3. An explanatory note was prepared by the Legal Committee in November 2000 and communicated to all Member States so that they could submit draft resolutions of this nature meeting the requisite criteria. That note was completed by two “finalizations” adopted by the Legal Committee at its November 2002 meeting and by the General Conference at its 33rd session, respectively.

4. Furthermore, through 36 C/Resolution 104 on the independent external evaluation of UNESCO, the General Conference emphasized in 2011 that the recommendation that draft resolutions with financial implications should clearly identify the main line of action from which the resources should come, should henceforth constitute an additional admissibility criterion to the draft resolutions relating to the C/5 document.

5. At its 37th session, the General Conference decided to amend articles 79 and 80 of the Rules of Procedure of the General Conference to reflect the explanatory note and the finalizations undertaken by the Legal Committee as well as 36 C/Resolution 104.

6. After being informed by the representative of the Director-General that no State had appealed against the conclusions of the Director-General concerning a draft resolution from a Member State with financial implications under Rule 80 of the Rules of Procedure of the General Conference, the Committee noted that there was no need to further examine this item.

Second report

CONSOLIDATED REPORT ON THE IMPLEMENTATION OF THE 1993 RECOMMENDATION ON THE RECOGNITION OF STUDIES AND QUALIFICATIONS IN HIGHER EDUCATION

1. The Legal Committee considered the consolidated report on the implementation of the 1993 Recommendation on the Recognition of Studies and Qualifications in Higher Education.

2. It took note of the report together with the comments made in that regard by the Committee on Conventions and Recommendations at the 197th session of the Executive Board. It also took note of the additional information provided by the representative of the Director-General on the implementation of the Recommendation.

3. A member of the Committee proposed that in the draft resolution, reference be made to the need to initiate a process for the revision of the 1974 Regional Convention on the Recognition of Studies, Diplomas and Degrees in Higher Education in Latin America and the Caribbean. In that regard, while recalling that it examined only the legal aspects of this item and not its substantive aspects, the Committee noted that such a proposal should be submitted during the consideration of the item before the Education Commission.

1 This report, containing the amended draft resolution, was transmitted to the ED Commission along with a note from the Chairperson of the Legal Committee, on 6 November 2015.
4. Another member of the Committee emphasized the importance of the recommendation, particularly in view of the existence of regional programmes for student exchanges between countries. On that point, the Committee considered it best not to amend the draft resolution on such regional programmes, when the project referred to a universal instrument adopted by UNESCO.

5. The Committee adopted formal amendments to the text of the draft resolution contained in paragraph 7 of document 38 C/72 (38 C/Resolution 92).

Third report

THIRD CONSOLIDATED REPORT ON THE IMPLEMENTATION BY MEMBER STATES OF THE 2003 RECOMMENDATION CONCERNING THE PROMOTION AND USE OF MULTILINGUALISM AND UNIVERSAL ACCESS TO CYBERSPACE

1. The Legal Committee considered the third consolidated report on the implementation by Member States of the 2003 Recommendation concerning the Promotion and Use of Multilingualism and Universal Access to Cyberspace.

2. The Committee took note of the report together with the comments made in that regard by the Committee on Conventions and Recommendations at the 197th session of the Executive Board. It also took note of the additional information provided by the representative of the Director-General.

3. A Member of the Committee proposed that all of UNESCO’s standard-setting instruments for which no specific institutional mechanism is foreseen should be addressed by a strategy to improve their visibility and their implementation by Member States. In that regard, without commenting on the relevance of the proposal, the Committee recalled that the development of such a strategy was not within the competence of the Committee.

4. The Committee made certain amendments to the text of the draft resolution contained in paragraph 33 of document 38 C/28 (38 C/Resolution 97).

Fourth report

1. The Legal Committee considered the summary of the reports received from Member States on the measures taken to implement the 1970 Convention on the Means of Prohibiting and Preventing the Illicit Import, Export and Transfer of Ownership of Cultural Property.

2. The Committee took note of the report. It also took note of the additional information provided by the representative of the Director-General.

3. A Member of the Committee wondered why the Legal Committee was still being called upon to examine the monitoring of the 1970 Convention when, in 2012, States Parties to the 1970 Convention had set up a Subsidiary Committee composed of the representatives of 18 States Parties that was responsible for examining the periodic reports to be presented to the General Conference under Article 16 of the 1970 Convention.

4. The Legal Committee here pointed out that it had been called upon to examine this item, included in the agenda of the present session of the General Conference further to 36 C/Resolution 102, under Rule 37.2 of the Rules of Procedure of the General Conference, which provided that the Legal Committee should consider the reports on the conventions and recommendations, whether or not the conventions had established specific institutional monitoring mechanisms.

5. The Committee adopted formal amendments to the text of the draft resolution contained in paragraph 7 of document 38 C/29 (38 C/Resolution 96).

Fifth report

CONSOLIDATED REPORT ON THE IMPLEMENTATION BY MEMBER STATES OF THE 1980 RECOMMENDATION CONCERNING THE STATUS OF THE ARTIST

1. The Legal Committee examined the consolidated report on the implementation by Member States of the 1980 Recommendation Concerning the Status of the Artist.

2. The Committee took note of the report together with the comments made in that regard by the Committee on Conventions and Recommendations at the 197th session of the Executive Board.

3. It also took note of the additional information provided by the representative of the Director-General, particularly on the monitoring of the implementation of the Recommendation conducted in the framework of the 2005 Convention on the Protection

and Promotion of the Diversity of Cultural Expressions in order to make up for the lack of funding allocated to the activity in the Programme and Budget as approved by the General Conference.

4. Following the comments of some Members of the Committee and one observer, the Committee recalled that the substantive issues should be raised during consideration of the item in the Culture Commission.

5. The Committee adopted formal amendments to the text of the draft resolution contained in paragraph 10 of document 38 C/30 (38 C/Resolution 95).

Sixth report

REPORT ON THE IMPLEMENTATION BY MEMBER STATES OF THE 2011 RECOMMENDATION ON THE HISTORIC URBAN LANDSCAPE, INCLUDING A GLOSSARY OF DEFINITIONS

Preamble

The General Conference of the United Nations Educational, Scientific and Cultural Organization (UNESCO), meeting in Paris from 3 to 18 November 2015, at its 38th session,

Reaffirming that in the framework of lifelong learning, literacy constitutes an indispensable foundation and adult learning and education an integral part. Literacy and adult learning and education contribute to the realization of the right to education that enables adults to exercise other economic, political, social and cultural rights, and which should meet the key criteria of availability, accessibility, acceptability and adaptability in conformity with General Comment No. 13 of the Committee on Economic, Social and Cultural Rights of the United Nations Economic and Social Council (21st session) referring to Article 13 of the International Covenant on Economic, Social and Cultural Rights,

Acknowledging that we live in a rapidly changing world, in which governments and citizens face simultaneous challenges which prompt us to review the conditions for realizing the right to education for all adults,

Reiterating the significant role of adult learning and education in the 2030 Agenda for Sustainable Development adopted at the United Nations Sustainable Development Summit (New York, September 2015), and noting the commitment of the international community to the promotion of social development, sustained and inclusive economic growth, environmental protection and the eradication of poverty and hunger,

In the light of the Incheon Declaration “Education 2030: Towards inclusive and equitable quality education and lifelong learning for all” and the Education 2030 Framework for Action,

Acknowledging both the achievements made in the development of adult learning and education since 1976, as discussed during the 1985, 1997 and 2009 International Conferences on Adult Education (CONFINTEA IV, V and VI) and at the education for all (EFA) conferences (World Conference on EFA, Jomtien 1990 and World Education Forum, Dakar 2000), and the need to further strengthen adult learning and education, as documented in the 2009 and 2013 Global Reports on Adult Learning and Education (GRALE),

Referring to the International Standard Classification of Education (ISCED 2011),

Underlining the relevance of improving technical and vocational education and training as expressed in the UNESCO Recommendation concerning Technical and Vocational Education and Training (2015), which contains specific provisions for continuing training and professional development,

Having decided by means of 37 C/Resolution 16 that the 1976 Recommendation on the Development of Adult Education should be revised to reflect contemporary educational, cultural, political, social and economic challenges, as set out in the Hamburg Declaration and the Belém Framework for Action, and to give renewed momentum to adult education,

Considering that this Recommendation sets out general principles, goals and guidelines that each Member State should apply according to its socio-economic context, governing structures and available resources, with a view to enhancing the status of adult learning and education at the national, regional and international levels,

Having examined document 38 C/31 and the draft Recommendation on Adult Learning and Education annexed thereto,

1. Adopts the present Recommendation on Adult Learning and Education, which supersedes the 1976 Recommendation, on this thirteenth day of November 2015;

2. Recommends that Member States apply the following provisions by taking appropriate steps, including whatever legislative or other steps may be required, in conformity with the constitutional practice and governing structures of each State, to give effect within their territories to the principles of this Recommendation;
Also recommends that Member States bring this Recommendation to the attention of the authorities and bodies responsible for adult learning and education and also of other stakeholders concerned with adult learning and education;

Further recommends that Member States report to it, at such dates and in such manner as shall be determined by it, on the action taken by them in pursuance of this Recommendation.

I. DEFINITION AND SCOPE

1. Adult learning and education is a core component of lifelong learning. It comprises all forms of education and learning that aim to ensure that all adults participate in their societies and the world of work. It denotes the entire body of learning processes, formal, non-formal and informal, whereby those regarded as adults by the society in which they live, develop and enrich their capabilities for living and working, both in their own interests and those of their communities, organizations and societies. Adult learning and education involves sustained activities and processes of acquiring, recognizing, exchanging, and adapting capabilities. Given that the boundaries of youth and adulthood are shifting in most cultures, in this text the term “adult” denotes all those who engage in adult learning and education, even if they have not reached the legal age of maturity.

2. Adult learning and education constitutes a major building block of a learning society, and for the creation of learning communities, cities and regions as they foster a culture of learning throughout life and revitalize learning in families, communities and other learning spaces, and in the workplace.

3. The types of adult learning and education activities vary widely. Adult learning and education includes many learning opportunities for equipping adults with literacy and basic skills; for continuing training and professional development, and for active citizenship, through what is variously known as community, popular or liberal education. Adult learning and education provides a variety of learning pathways and flexible learning opportunities, including second chance programmes to make up for lack of initial schooling, including for people who have never been to school, early school leavers and drop outs.

4. Literacy is a key component of adult learning and education. It involves a continuum of learning and proficiency levels which allows citizens to engage in lifelong learning and participate fully in community, workplace and wider society. It includes the ability to read and write, to identify, understand, interpret, create, communicate and compute, using printed and written materials, as well as the ability to solve problems in an increasingly technological and information-rich environment. Literacy is an essential means of building people’s knowledge, skills and competencies to cope with the evolving challenges and complexities of life, culture, economy and society.

5. Continuing training and professional development is a fundamental element in a continuum of learning that equips adults with the knowledge, skills and competencies to fully engage in rapidly-changing societal and working environments. The UNESCO Recommendation concerning Technical and Vocational Education and Training (2015) contains relevant provisions in this area.

6. Adult learning and education also includes education and learning opportunities for active citizenship, variously known as community, popular or liberal education. It empowers people to actively engage with social issues such as poverty, gender, intergenerational solidarity, social mobility, justice, equity, exclusion, violence, unemployment, environmental protection and climate change. It also helps people to lead a decent life, in terms of health and well-being, culture, spirituality and in all other ways that contribute to personal development and dignity.

7. Information and communication technologies (ICT) are seen as holding great potential for improving access by adults to a variety of learning opportunities and promoting equity and inclusion. They offer various innovative possibilities for realizing lifelong learning, reducing the dependence on traditional formal structures of education and permitting individualized learning. Through mobile devices, electronic networking, social media and on-line courses, adult learners can have access to opportunities to learn anytime and anywhere. Information and communication technologies have also considerable capacity for facilitating access to education for people with disabilities permitting their fuller integration into society, as well as for other marginalized or disadvantaged groups.

II. AIMS AND OBJECTIVES

8. The aim of adult learning and education is to equip people with the necessary capabilities to exercise and realize their rights and take control of their destinies. It promotes personal and professional development, thereby supporting more active engagement by adults with their societies, communities and environments. It fosters sustainable and inclusive economic growth and decent work prospects for individuals. It is therefore a crucial tool in alleviating poverty, improving health and well-being and contributing to sustainable learning societies.

9. The objectives of adult learning and education are (a) to develop the capacity of individuals to think critically and to act with autonomy and a sense of responsibility; (b) to reinforce the capacity to deal with and shape the developments taking place in the economy and the world of work; (c) to contribute to the creation of a learning society where every individual has an opportunity to learn and fully participate in sustainable development processes and to enhance solidarity among people and communities; (d) to promote peaceful coexistence and human rights; (e) to foster resilience in young and older adults; (f) to enhance awareness for the protection of the environment.

This acknowledging their contribution to societal development while respecting cultural and other forms of diversity, including accessibility, autonomy, equity and inclusion issues. Particular attention should be given to specific target groups, with a view to provisions, promoting participation, inclusion and equity so that no individual is excluded from adult learning and education programmes. Member States should consider:

(a) prioritizing investment in literacy and basic skills, and continuing adult learning and education;
(b) fostering inter-ministerial coordination between policy areas (e.g. economic development, human resource, labour, health, agriculture, and environment), which is essential in optimizing the use of resources (cost-effectiveness and cost-sharing) and maximizing learning outcomes;
(c) making the allocation and use of resources transparent to reflect the priorities that have been established according to research results on the current situation of adult education.

22. Member States should consider, according to their specific conditions, governing structures and constitutional provisions, promoting participation, inclusion and equity so that no individual is excluded from adult learning and education and that quality learning opportunities are available to all women and men of diverse social, cultural, linguistic, economic, educational and other backgrounds.

Participation, inclusion and equity

23. To promote access and broader participation, Member States should consider, according to their specific conditions, governing structures and constitutional provisions, developing effective educational responses, especially to address accessibility, autonomy, equity and inclusion issues. Particular attention should be given to specific target groups, with a view to acknowledging their contribution to societal development while respecting cultural and other forms of diversity, including multilingualism, and ensure that further qualifications are not only validated but valued with regard to income and status. This implies:

(a) establishing appropriate strategies to promote adults’ access to and participation in learning activities and to enhance incentives for them to undertake such activities;
(b) tolerating no discrimination on any grounds, including age, gender, ethnicity, migrant status, language, religion, disability, illness, rurality, sexual identity or orientation, poverty, displacement, imprisonment, occupation or profession;

(f) improving training, capacity building, employment conditions and the professionalization of adult educators;
(g) enabling learners to acquire and accumulate learning, experiences and qualifications through flexible participation and accumulation of learning outcomes at different stages. Learning outcomes from participation in non-formal and informal adult learning and education should be recognized, validated and accredited as having equivalent values to those granted by formal education (e.g. in accordance with National Qualification Frameworks) to allow for continuing education and access to the labour market, without facing discrimination barriers.

IV. INTERNATIONAL COOPERATION

29. To promote the development and strengthening of adult learning and education, Member States should consider increasing cooperation between all relevant stakeholders, including governmental bodies, research institutions, civil society organizations, unions, development assistance agencies, the private sector and the media, whether on a bilateral or multilateral basis, and enhance United Nations interagency cooperation. Sustained international cooperation implies:

(a) promoting and stimulating development within the countries concerned through appropriate institutions and structures adapted to the particular circumstances of those countries;
(b) creating a climate favourable to international cooperation with a view to capacity building in developing countries in different areas of adult learning and education and encouraging mutual cooperative assistance between all countries regardless of their state of development, as well as making full use of the advantage presented by mechanisms of regional integration to facilitate and strengthen this process;
(c) ensuring that international cooperation does not merely involve the transfer of structures, curricula, methods and techniques that have originated elsewhere.

30. Member States, as part of the international community, should consider sharing their experiences, increasing and improving mutual cooperative assistance, and help build each other's capacities in adult education, taking into account their national priorities. This implies:

(a) fostering the regular exchange of information, documentation and materials on policies, concepts and practices and relevant research, as well as adult learning and education professionals at national, regional and international levels. The use and transfer of new information and communication technologies should be maximized and the mobility of learners between Member States should be facilitated;
(b) enhancing South-South, North-South and triangular cooperation, giving priority to countries where the education deficits are the widest, by applying findings from international reports and research;

(c) collecting and presenting data on adult learning and education, through and with the support of UNESCO, including the UNESCO Institute for Lifelong Learning (UIL), and the established mechanisms to produce relevant reports, such as the Global Report on Adult Learning and Education (GRALE). This implies the further enhancement of international data collection mechanisms based on agreed indicators and definitions, building on countries’ capacities to produce data, and the dissemination of such data at various levels;

(d) encouraging governments and development cooperation agencies to support the enhancement of local, regional and global cooperation and networking between all relevant stakeholders. Exploring how regional and global funding mechanisms for literacy and adult education could be established and strengthened and how existing mechanisms can support the international, regional and national efforts mentioned above;

(e) incorporating, where appropriate, specific clauses relating to adult learning and education in international agreements concerned with cooperation in the fields of education, science and culture, and promoting the development and strengthening of adult learning and education efforts in the United Nations and UNESCO, and in the attainment of the United Nations’ Sustainable Development Goals.

Preamble

The General Conference of the United Nations Educational, Scientific and Cultural Organization (UNESCO), meeting in Paris from 3 to 18 November 2015, at its 38th session,

Conscious that technical and vocational education and training (TVET) is understood as being part of both the universal right to education and the right to work,

Recognizing that TVET meets the "aim of developing both individuals and societies” as stipulated in the Convention on Technical and Vocational Education (1989),

Recalling also the relevant instruments adopted by the International Labour Organization (ILO) including the 1975 Convention concerning Vocational Guidance and Vocational Training in the Development of Human Resources (No. 142) and the 2004 Recommendation concerning Human Resources Development: Education, Training and Lifelong Learning (No. 195),

Referring to the International Standard Classification of Education (ISCED 2011),

Recognizing that technical and vocational education and training (TVET) contributes towards the promotion of understanding and respect for human rights; inclusion and equity; gender equality and cultural diversity; and to the fostering of a desire and capacity for lifelong learning and learning to live together, all of which are essential to social and economic participation and to the realization of lasting peace, responsible citizenship, and sustainable development,

Bearing in mind the key role of technical and vocational education and training (TVET) in the 2030 Agenda for Sustainable Development adopted at the United Nations Sustainable Development Summit (New York, September 2015) and noting the commitment of the international community to the promotion of sustained and inclusive economic growth, social development, environmental protection to benefit all, and the eradication of poverty and hunger,

In the light of the Incheon Declaration "Education 2030: Towards inclusive and equitable quality education and lifelong learning for all" and the Education 2030 Framework for Action,

Taking into account the recommendations of the Bonn Declaration - Learning for Work, Citizenship and Sustainability (2004), the recommendations of the Third International Congress on Technical and Vocational Education and Training, "Transforming TVET: Building skills for work and life”, known as the Shanghai Consensus (2012) and the Aichi-Nagoya Declaration on Education for Sustainable Development (2014),

Having decided by means of 37 C/Resolution 17 that the 2001 Revised Recommendation concerning Technical and Vocational Education should be revised to reflect the new trends and issues in technical and vocational education and training,
Considering that this Recommendation sets out general principles, goals and guidelines that each Member State should apply according to its socio-economic context, governing structures and available resources in a changing world, with a view also to transforming, expanding and enhancing technical and vocational education and training (TVET) at national, regional and international levels,

Having examined document 38 C/32 and the draft Recommendation concerning Technical and Vocational Education and Training annexed thereto,

3. Also recommends that Member States bring this Recommendation to the attention of the authorities and bodies responsible for TVET, and of other stakeholders concerned with technical and vocational education and training (TVET);

4. Further recommends that Member States report to it, at such dates and in such manner as shall be determined by it, on the action taken by them in pursuance of this Recommendation.

I. SCOPE OF THIS RECOMMENDATION

1. For the purpose of this Recommendation, ‘technical and vocational education and training’ (hereinafter “TVET”) is understood as comprising education, training and skills development relating to a wide range of occupational fields, production, services and livelihoods.

2. TVET, as part of lifelong learning, can take place at secondary, post-secondary and tertiary levels and includes work-based learning and continuing training and professional development which may lead to qualifications. TVET also includes a wide range of skills development opportunities attuned to national and local contexts. Learning to learn and the development of literacy and numeracy skills, transversal skills and citizenship skills are integral components of TVET.

3. The application of the provisions of this Recommendation will depend upon the specific conditions, governing structures, and constitutional provisions existing in a given country.

TVET contributes to the development of knowledge, skills and competencies for green occupations, economies and societies. TVET contributes to the development of innovations and technological solutions needed to address climate change and to preserve environmental integrity.

III. POLICIES AND GOVERNANCE

Policy development

9. Member States should, according to their specific conditions, governing structures and constitutional provisions, develop policies relating to TVET that are consistent with a broad range of policy fields, including education, employment and the overall strategic objectives of governments, in particular their economic, social and environmental objectives.
10. Member States should guide, recognize and promote TVET in all forms and settings through an overall lifelong learning framework that should be oriented to equipping all youth and adults with relevant knowledge, skills and competencies for work and life and producing better labour market and social outcomes.

11. Member States should raise the public profile and attractiveness of TVET among learners, families and all other stakeholders and inform them of the possibilities for progression, work, lifelong learning and self-fulfilment. Member States should address, according to their circumstances, the multidimensional issues influencing the attractiveness of TVET and promote measures such as improving the permeability and diversity of pathways and programmes, providing incentives and improving information and guidance.

12. Member States expanding TVET at secondary, post-secondary and tertiary levels as appropriate to their education and training systems and authorities should ensure that there is an institutional framework to engage labour market stakeholders, that qualifications and curricula are developed in consultation with relevant stakeholders, and that programmes and qualifications are transparent and quality assured.

13. Member States should develop pathways and facilitate transitions between secondary, post-secondary and tertiary education including flexible admission procedures and guidance, credit accumulation and transfer, bridging programmes and equivalency schemes that are recognized and accredited by relevant authorities. TVET institutions, and other education institutions and authorities, should collaborate for the implementation of such measures.

14. Member States, according to their specific conditions, governing structures and constitutional provisions, should support continuing training and professional development by promoting access and broadening participation by adult learners, including by encouraging enterprises, in particular small and medium-sized enterprises, to invest in their workers.

Governance and regulatory framework

15. Member States, assuming the primary responsibility for public policies, should consider defining or strengthening a regulatory framework for TVET to define the roles, rights, obligations and accountabilities of its public and private actors, and to encourage stakeholder participation and partnerships.

16. Member States should facilitate inter-ministerial coordination and strengthen the technical, administrative and institutional capacities for the governance, management and financing of TVET.

17. Member States, according to their governance structures, should consider establishing or strengthening governance models for TVET institutions involving relevant local stakeholders and cooperating, when relevant, with business associations in supporting work-based learning.

Social dialogue, private sector and other stakeholders’ involvement

18. Member States should, as appropriate, foster social partners’ participation in TVET according to agreed labour market, education, training and other regulations.

19. Increased private sector participation in TVET should be guided by key principles including alignment with public policies, support for social dialogue, responsibility, accountability and efficiency. When involving the private sector, TVET policies should recognize its diversity, including large, medium-sized, small, micro and household enterprises engaged in all sectors of the economy.

20. To enhance policy development and governance Member States should also, as appropriate, engage with other stakeholders, including non-governmental organizations, and representatives of learners, TVET providers, staff, parents, youth, traditional leaders, indigenous people and others.

Financing

21. Member States should set up measures aiming at diversifying sources of funding and involving all stakeholders through a variety of partnerships, including public-private partnerships. Diversification should be considered by engaging enterprises, local authorities and individuals while respecting the principles of equity and inclusion. In addition to existing frameworks for public financing, innovative funding mechanisms such as partnerships and cost sharing, tax deduction and loans, can be explored to increase efficiency and accountability and to stimulate demand for TVET.

22. Various forms of incentives and accountability mechanisms should be established aiming at raising awareness and increasing investment in TVET by a broad range of actors and shifting the traditional input-based models of allocation and use of resources to more performance-based financing models.

23. TVET institutions, including at the secondary, post-secondary and tertiary levels, should have adequate funding for their operations, including infrastructure, equipment and their maintenance. TVET institutions should have appropriate levels of operational and financial autonomy to enable them to engage with their local contexts, to build new partnerships for improving the quality and relevance of TVET programmes, and to generate revenues.

Equity and access

24. Member States should take measures to ensure that all youth and adults have equal opportunities to learn, develop and enhance their knowledge, skills and competencies by transforming and expanding TVET in all its forms to address the great diversity of learning and training needs. Information and communication technologies should be considered as a means to widen access and participation, according to context.

25. Member States, according to their governing structures, should ensure quality basic education for all, and address the needs of out-of-school youth and low-skilled adults by developing basic literacy, numeracy and transversal skills, as a foundation for meaningful participation in TVET. Education and other stakeholders should create the conditions for TVET for all, so that it may be freely chosen.
26. Measures should be taken against all forms of discrimination, including gender-based discrimination. Member States should promote equal access and participation of females and males in quality TVET. All forms of TVET institutions, programmes, curricula, materials and work-based learning should avoid gender-based and other stereotyping, and should contribute to the achievement of gender equality. Member States should adopt innovative mechanisms to promote equity and access, such as financial incentives to influence admissions practices.

27. Member States should make TVET more accessible to all disadvantaged and vulnerable groups, including marginalized rural and remote populations, by providing targeted support to reduce the cost burden and to remove other obstacles. According to national contexts, Member States should give attention to learners with disabilities, indigenous people, nomadic populations, ethnic minority groups, socially-excluded groups, migrants, refugees, stateless people and populations affected by conflict or disaster, as well as to unemployed people and vulnerable workers.

IV. QUALITY AND RELEVANCE

Learning processes

28. Member States should, according to their specific conditions, governing structures and constitutional provisions, encourage a variety of learning opportunities, whether in public and private TVET institutions, workplaces, homes, or other settings. Informal learning, whether self-directed, peer-to-peer or through other forms of social learning, should be encouraged and, if appropriate, made visible through recognition and validation mechanisms.

29. In addition to knowledge, skills and competencies relating to occupational fields, learning processes should build on foundation skills and further deepen understandings of the scientific, technological, social, cultural, environmental, economic and other aspects of societies. TVET should be holistic and develop transversal and entrepreneurial skills, skills for health and work safety, cultural development, responsible citizenship and sustainable development, as well as knowledge of labour rights.

30. Work-based learning in its various forms, including in-service training, attachments, apprenticeships and internships, should be promoted. The quality of work-based learning should be enhanced and when relevant be complemented by institution-based or other forms of learning.

31. Public policies should foster and facilitate quality apprenticeships composed of work and institution-based learning through social dialogue and public-private partnerships to help youth to develop their knowledge, skills and competencies and gain work experience.

32. TVET in the informal economy should be promoted, including through quality traditional apprenticeships in small, micro and household enterprises by engaging stakeholders in rural and urban areas.

33. The potential of information and communication technologies should be fully exploited in TVET. The Internet, mobile technologies and social media should be utilized to promote distance and online delivery, including through blended models and the development and use of open educational resources.

34. Effective and appropriate assessment systems for generating and using information on learners’ achievements should be established. Evaluation of teaching and learning processes, including formative assessment, should be undertaken with the participation of all stakeholders, notably teachers and trainers, representatives of the occupational fields concerned, supervisors and learners. Learners’ overall performance should be assessed using diversified methods of assessment, including self and peer assessment as appropriate.

TVET staff

35. Policies and frameworks should be developed to ensure qualified and high-quality TVET staff, including teachers, instructors, trainers, tutors, managers, administrators, extension agents, guidance staff and others.

36. The provisions of the Recommendation concerning the Status of Teachers (1966) are applicable, especially with regard to the provisions on preparation for the profession; further education for teachers; employment and career; the rights and responsibilities of teachers; conditions for effective teaching and learning; teachers’ salaries and social security. The Recommendation concerning the Status of Higher-Education Teaching Personnel (1997) is also applicable.

37. Given the growing consideration of work-based learning and TVET in other settings including community-based, distance and online, Member States need to more systematically support and acknowledge the emerging roles and learning needs of trainers, tutors and other facilitators, by considering the development or strengthening of policies and frameworks concerning their status, recruitment and professional development. TVET staff should have decent working conditions and adequate remuneration, as well as career and professional development opportunities.

38. TVET staff in educational institutions and the workplace should have the capacities required to make TVET responsive to the economic, social, cultural and environmental contexts of the communities and societies they serve and to contribute to the transformation and expansion of TVET. In particular, TVET staff require initial preparation, as well as continuing training and professional development, including experience working in enterprises, and support to enable them to reflect on their practices and to adapt to change. The initial and continuing professional development of TVET staff should include training on guidance and gender equality.

Qualifications systems and learning pathways

39. Well-articulated outcome-based qualifications frameworks or systems based on learning outcomes and relating to a set of agreed standards should be established, in consultation with stakeholders, based on identified needs including occupational standards.

40. Policy or regulatory mechanisms supporting horizontal and vertical progression should be established and include flexible learning pathways, modularization, the recognition of prior learning, accumulation and credit transfer. Special attention
should be given to encouraging low-skilled and unskilled individuals to gain certification for access to further learning and decent work.

41. Systems for the recognition, validation and accreditation of knowledge, skills and competencies acquired through non-formal and informal learning should be promoted with the tripartite involvement, when relevant, of workers’ representatives, employers’ representatives and public authorities. Reliable assessment procedures and quality assured certification should be established in cooperation with relevant stakeholders.

42. Member States should promote the mutual recognition of qualifications at national, regional and international levels, in relation to the mobility of learners and workers.

Quality and quality assurance

43. Member States should foster an environment for high-quality TVET, according to their specific conditions, governing structures and constitutional provisions. Special attention should be given to building the necessary capacities for quality enhancement.

44. Member States should establish a system for quality assurance in TVET based on participation by all relevant stakeholders. Quality assurance systems should include clear and measurable objectives and standards, guidelines for implementation, and feedback mechanisms and widely accessible evaluation results. Quality assurance should include both external and self-assessment, through which system performance and outcomes can be continuously monitored and improved.

45. Member States should seek to improve the leadership and management of TVET institutions. Quality and quality assurance in TVET should engage the entire staff of educational institutions and other relevant stakeholders.

46. Member States should establish, according to their constitutional provisions, an appropriate legal framework for the regulation, registration and monitoring of private TVET providers with the protection of learners as a core guiding principle.

Relevance to labour markets and the world of work

47. Member States, in line with their specific conditions, governing structures and constitutional provisions, should support and facilitate transitions from education to the world of work, employment and/or self-employment. Linkages between TVET institutions, employment agencies and employers should be strengthened and support should be given to entrepreneurship and the creation of new businesses, for example by integrating entrepreneurial skills in curricula, by organizing extra-curricular activities and by setting up business incubators and partnerships with business and technology transfer centres.

48. Member States should establish TVET and labour market information systems, using open data when relevant, and facilitate transitions from education to the world of work, employment and/or self-employment. Linkages between TVET institutions, employment agencies and employers should be strengthened and support should be given to entrepreneurship and the creation of new businesses, for example by integrating entrepreneurial skills in curricula, by organizing extra-curricular activities and by setting up business incubators and partnerships with business and technology transfer centres.

49. Public-private partnerships arrangements could be used to identify and anticipate skills needed, for example through prospective studies, observatories or sector skills councils. Furthermore, data collection and analyses of changing contexts and the systematic monitoring and evaluation of implementation and results should inform efforts to enhance the relevance of TVET.

Information and guidance

50. Member States should facilitate, in cooperation with relevant stakeholders, the development and regulation of public and private information and guidance services, in order to provide up-to-date and reliable support in relation to education, continuing training and professional development, and work opportunities at national, regional and international levels.

51. Information and guidance should be offered continuously and directed towards aiding and supporting all individuals in more complex and diversified careers and working lives, giving particular attention to promoting equality of opportunity in all its dimensions, including gender equality, so as to address social inequalities in education, the world of work and wider society.

52. Information and guidance services should support learners in their decision-making through information and communications technologies, including mobile technologies, social networks and multimedia platforms and tools.

V. MONITORING AND EVALUATION

53. Member States should, according to their specific conditions, governing structures and constitutional provisions, evaluate TVET policies and programmes. Evaluations could include studies of the impacts and outcomes of TVET policies and programmes and investigation of the costs and benefits of TVET for a broad range of public and private actors including individuals, enterprises and communities.

54. Appropriate tools and indicators should be developed for measuring the effectiveness and efficiency of TVET policies against agreed standards, priorities and targets, including specific targets for disadvantaged and vulnerable groups. This could involve evaluations of public and private institutions, providers and programmes, including self-evaluations, as well as tracer studies and the development of sets of indicators including on access, completion rates and the employment status of graduates. Data collection and processing should be conducted in accordance with legislation on data protection.

55. Institutional capacities for data collection and the use of information from monitoring and evaluation to inform TVET strategies and programmes, standards and curricula, or to adjust learning methods, should be strengthened. Coherence between national data collection on TVET and international standards and initiatives should be enhanced.

56. Processes for monitoring and evaluating TVET should ensure broad participation of relevant stakeholders, with a view to improving learning processes and strengthening the connections between findings, decision-making, transparency and accountability for results.
VI. RESEARCH AND KNOWLEDGE MANAGEMENT

57. Member States should deepen the knowledge base for TVET through sustained investment in interdisciplinary research so as to develop new methodologies and understandings of TVET in its broad context and to inform TVET policies and decision-making.

58. Stakeholders, as appropriate, should be involved in commissioning, using and evaluating research, as well as in the development of strategies and systems for knowledge management. The research capacities of tertiary education institutions, TVET providers, social partners and other relevant stakeholders should be utilized and developed according to contexts. Research findings should be widely disseminated through publications and electronic means.

VII. INTERNATIONAL COOPERATION

59. Member States should consider sharing knowledge, experiences and promising practices, reinforce international TVET data collection and make use of international and regional networks, conferences, and other fora. The UNESCO International Centre for Technical and Vocational Education and Training (UNEVOC) Network is a strategic resource available to Member States for mutual learning and advancing international cooperation in TVET.

60. Member States should associate entities of the United Nations system, regional bodies, including regional economic communities, relevant public and private stakeholders, civil society organizations and research networks in promoting cooperation, increasing mutual and cooperative assistance and building capacities.
ANNEX IV RECOMMENDATION CONCERNING THE PROTECTION AND PROMOTION OF MUSEUMS AND COLLECTIONS,
THEIR DIVERSITY AND THEIR ROLE IN SOCIETY

The General Conference,

Considering that museums share some of the fundamental missions of the Organization, as stipulated in its Constitution, including its contribution to the wide diffusion of culture, and the education of humanity for justice, liberty and peace, the foundation of the intellectual and moral solidarity of humanity, full and equal opportunities for education for all, in the unrestricted pursuit of objective truth, and in the free exchange of ideas and knowledge,

Also considering that one of the functions of the Organization, as laid out in its Constitution, is to give fresh impulse to popular education and to the spread of culture: by collaborating with Members, at their request, in the development of educational activities; by instituting collaboration among countries to advance the ideal of equality of educational opportunity without regard to race, gender or any distinctions, economic or social; and to maintain, increase and diffuse knowledge,

Recognizing the importance of culture in its diverse forms in time and space, the benefit that peoples and societies draw from this diversity, and the need to strategically incorporate culture, in its diversity, into national and international development policies, in the interest of communities, peoples and countries,

Affirming that the preservation, study and transmission of cultural and natural, tangible and intangible heritage, in its movable and immovable conditions, are of great importance for all societies, for intercultural dialogue among peoples, for social cohesion, and for sustainable development,

Reaffirming that museums can effectively contribute towards accomplishing these tasks, as stated in the 1960 Recommendation concerning the Most Effective Means of Rendering Museums Accessible to Everyone, which was adopted by the General Conference of UNESCO at its 11th session (Paris, 14 December 1960),

Further affirming that museums and collections contribute to the enhancement of human rights, as set out in the Universal Declaration of Human Rights, in particular its Article 27, and in the International Covenant on Economic, Social and Cultural Rights, in particular its Articles 13 and 15,

Considering museums’ intrinsic value as custodians of heritage, and that they also play an ever-increasing role in stimulating creativity, providing opportunities for creative and cultural industries, and for enjoyment, thus contributing to the material and spiritual well-being of citizens across the world,

Considering that it is the responsibility of every Member State to protect the cultural and natural heritage, tangible and intangible, movable and immovable, in the territory under its jurisdiction in all circumstances and to support the actions of museums and the role of collections to that end,

Noting that a body of international standard-setting instruments – adopted at UNESCO and elsewhere – including conventions, recommendations and declarations, exists on the subject of the role of museums and collections, all of which remain valid,

Taking into account the magnitude of socio-economic and political changes that have affected the role and diversity of museums since the adoption of the 1960 Recommendation concerning the Most Effective Means of Rendering Museums Accessible to Everyone,

Desiring to reinforce the protection provided by the existing standards and principles referring to the role of museums and collections in favour of cultural and natural heritage, in its tangible and intangible forms, and to related roles and responsibilities,

Having considered proposals on the Recommendation concerning the Protection and Promotion of Museums and Collections, their Diversity and their Role in Society,

Recalling that a UNESCO recommendation is a non-binding instrument that provides principles and policy guidelines addressing different stakeholders,

Adopts this Recommendation on the seventeenth day of November 2015.
The General Conference recommends that Member States apply the following provisions by taking whatever legislative or other measures may be required to implement, within the respective territories under their jurisdiction, the principles and norms set forth in this Recommendation.

INTRODUCTION

1. The protection and promotion of cultural and natural diversity are major challenges of the twenty-first century. In this respect, museums and collections constitute primary means by which tangible and intangible testimonies of nature and human cultures are safeguarded.

2. Museums as spaces for cultural transmission, intercultural dialogue, learning, discussion and training, also play an important role in education (formal, informal, and lifelong learning), social cohesion and sustainable development. Museums have great potential to raise public awareness of the value of cultural and natural heritage and of the responsibility of all citizens to contribute to their care and transmission. Museums also support economic development, notably through cultural and creative industries and tourism.

3. This Recommendation draws the attention of Member States to the importance of the protection and promotion of museums and collections, so that they are partners in sustainable development through the preservation and protection of heritage, the protection and promotion of cultural diversity, the transmission of scientific knowledge, the development of educational policy, lifelong learning and social cohesion, and the development of the creative industries and the tourism economy.

I. DEFINITION AND DIVERSITY OF MUSEUMS

4. In this Recommendation, the term 

**museum**

is defined as a “non-profit, permanent institution in the service of society and its development, open to the public, which acquires, conserves, researches, communicates and exhibits the tangible and intangible heritage of humanity and its environment for the purpose of education, study and enjoyment”\(^2\). As such, museums are institutions that seek to represent the natural and cultural diversity of humanity, playing an essential role in the protection, preservation and transmission of heritage.

5. In the present Recommendation, the term 

**collection**

is defined as “an assemblage of natural and cultural properties, tangible and intangible, past and present”\(^3\). Every Member State should define the scope of what it understands by collection in terms of its own legal framework, for the purpose of this Recommendation.

6. In the present Recommendation, the term 

**heritage**

is defined as a set of tangible and intangible values, and expressions that people select and identify, independently of ownership, as a reflection and expression of their identities, beliefs, knowledge and traditions, and living environments, deserving of protection and enhancement by contemporary generations and transmission to future generations. The term heritage also refers to the definitions of cultural and natural heritage, tangible and intangible, cultural property and cultural objects as included in the UNESCO culture conventions.

II. PRIMARY FUNCTIONS OF MUSEUMS

**Preservation**

7. The preservation of heritage comprises activities related to acquisition, collection management, including risk analysis and the development of preparedness capacities and emergency plans, in addition to security, preventive and remedial conservation, and the restoration of museum objects, ensuring the integrity of the collections when used and stored.

8. A key component of collection management in museums is the creation and maintenance of a professional inventory and regular control of collections. An inventory is an essential tool for protecting museums, preventing and fighting illicit trafficking, and helping museums fulfill their role in society. It also facilitates the sound management of collections mobility.

**Research**

9. Research, including the study of collections, is another primary function of museums. Research can be carried out by museums in collaboration with others. It is only through the knowledge obtained from such research that the full potential of museums can be realized and offered to the public. Research is of utmost importance for museums to provide opportunities to reflect on history in a contemporary context, as well as for the interpretation, representation and presentation of collections.

**Communication**

10. Communication is another primary function of museums. Member States should encourage museums to actively interpret and disseminate knowledge on collections, monuments and sites within their specific areas of expertise and to organize exhibitions, as appropriate. Furthermore, museums should be encouraged to use all means of communication to play an active part in society by, for example, organizing public events, taking part in relevant cultural activities and other interactions with the public in both physical and digital forms.

11. Communication policies should take into account integration, access and social inclusion, and should be conducted in collaboration with the public, including groups that do not normally visit museums. Museum actions should also be strengthened by the actions of the public and communities in their favour.
**Education**

12. Education is another primary function of museums. Museums engage in formal and non-formal education and lifelong learning, through the development and transmission of knowledge, educational and pedagogical programmes, in partnership with other educational institutions, notably schools. Educational programmes in museums primarily contribute to educating various audiences about the subject matters of their collections and about civic life, as well as helping to raise greater awareness of the importance of preserving heritage, and fostering creativity. Museums can also provide knowledge and experiences that contribute to the understanding of related societal topics.

**III. ISSUES FOR MUSEUMS IN SOCIETY**

**Globalization**

13. Globalization has permitted greater mobility of collections, professionals, visitors and ideas which has impacted museums with both positive and negative effects that are reflected in increased accessibility and homogenization. Member States should promote the safeguarding of the diversity and identity that characterize museums and collections without diminishing the museums’ role in the globalized world.

**Museum relations with the economy and quality of life**

14. Member States should recognize that museums can be economic actors in society and contribute to income-generating activities. Moreover, they participate in the tourism economy and with productive projects contributing to the quality of life of the communities and regions in which they are located. More generally, they can also enhance the social inclusion of vulnerable populations.

15. In order to diversify their sources of revenue and increase self-sustainability, many museums have, by choice or necessity, increased their income-generating activities. Member States should not accord a high priority to revenue generation to the detriment of the primary functions of museums. Member States should recognize that those primary functions, while of utmost importance for society, cannot be expressed in purely financial terms.

**Social role**

16. Member States are encouraged to support the social role of museums that was highlighted by the 1972 Declaration of Santiago de Chile. Museums are increasingly viewed in all countries as playing a key role in society and as a factor in social integration and cohesion. In this sense, they can help communities to face profound changes in society, including those leading to a rise in inequality and the breakdown of social ties.

17. Museums are vital public spaces that should address all of society and can therefore play an important role in the development of social ties and cohesion, building citizenship, and reflecting on collective identities. Museums should be places that are open to all and committed to physical and cultural access to all, including disadvantaged groups. They can constitute spaces for reflection and debate on historical, social, cultural and scientific issues. Museums should also foster respect for human rights and gender equality. Member States should encourage museums to fulfill all of these roles.

18. In instances where the cultural heritage of indigenous peoples is represented in museum collections, Member States should take appropriate measures to encourage and facilitate dialogue and the building of constructive relationships between those museums and indigenous peoples concerning the management of those collections, and, where appropriate, return or restitution in accordance with applicable laws and policies.

**Museums and information and communication technologies (ICTs)**

19. The changes brought about by the rise of information and communication technologies (ICTs) offer opportunities for museums in terms of the preservation, study, creation and transmission of heritage and related knowledge. Member States should support museums to share and disseminate knowledge and ensure that museums have the means to have access to these technologies when they are judged necessary to improve their primary functions.

**IV. POLICIES**

**General policies**

20. Existing international instruments relating to cultural and natural heritage recognize the importance and social role of museums in their protection and promotion, and in the overall accessibility of this heritage to the public. In this regard, Member States should take appropriate measures so that museums and collections in the territories under their jurisdiction or control benefit from the protective and promotional measures granted by these instruments. Member States should also take appropriate measures to strengthen museum capacities for their protection in all circumstances.

21. Member States should ensure that museums implement principles of applicable international instruments. Museums are committed to observe the principles of international instruments for the protection and promotion of cultural and natural heritage, both tangible and intangible. They also should adhere to the principles of the international instruments for the fight against illicit trafficking of cultural property and should coordinate their efforts in this matter. Museums must also take into account the ethical and professional standards established by the professional museum community. Member States should ensure that the role of museums in society is exercised in accordance with legal and professional standards in the territories under their jurisdiction.
22. Member States should adopt policies and take appropriate measures to ensure the protection and promotion of museums located in the territories under their jurisdiction or control, by supporting and developing those institutions in accordance with their primary functions, and in this regard develop the necessary human, physical and financial resources needed for them to function properly.

23. The diversity of museums and the heritage of which they are custodians constitutes their greatest value. Member States are requested to protect and promote this diversity, while encouraging museums to draw on high-quality criteria defined and promoted by national and international museum communities.

Functional policies

24. Member States are invited to support active preservation, research, education and communication policies, adapted to local social and cultural contexts, to allow museums to protect and pass down heritage to future generations. In this perspective, collaborative and participative efforts between museums, communities, civil society and the public should be strongly encouraged.

25. Member States should take appropriate measures to ensure that the compilation of inventories based on international standards is a priority in the museums established in the territory under their jurisdiction. The digitization of museum collections is highly important in this regard, but should not be considered as a replacement for the conservation of collections.

26. Good practices for the functioning, protection and promotion of museums and their diversity and role in society have been recognized by national and international museum networks. These good practices are continually updated to reflect innovations in the field. In this respect, the Code of Ethics for Museums adopted by the International Council of Museums (ICOM) constitutes the most widely shared reference. Member States are encouraged to promote the adoption and dissemination of these and other codes of ethics and good practices and to use them to inform the development of standards, museum policies and national legislation.

27. Member States should take appropriate measures to facilitate the employment of qualified personnel by museums in the territories under their jurisdiction with the required expertise. Adequate opportunities for the continuing education and professional development of all museum personnel should be arranged to maintain an effective workforce.

28. The effective functioning of museums is directly influenced by public and private funding and appropriate partnerships. Member States should strive to ensure a clear vision, adequate planning and funding for museums, and a harmonious balance among the different funding mechanisms to enable them to carry out their mission to the benefit of society with full respect for their primary functions.

29. The functions of museums are also influenced by new technologies and their growing role in everyday life. These technologies have great potential for promoting museums throughout the world, but they also constitute potential barriers for people and museums that do not have access to them or the knowledge and skills to use them effectively. Member States should strive to provide access to these technologies for museums in the territories under their jurisdiction or control.

30. The social role of museums, along with the preservation of heritage, constitutes their fundamental purpose. The spirit of the 1960 Recommendation concerning the Most Effective Means of Rendering Museums Accessible to Everyone remains important in creating a lasting place for museums in society. Member States should strive to include these principles in the laws concerning the museums established in the territories under their jurisdiction.

31. Cooperation within the museum sectors and institutions responsible for culture, heritage and education is one of the most effective and sustainable ways of protecting and promoting museums, their diversity and their role in society. Member States should therefore encourage cooperation and partnerships among museums and cultural and scientific institutions at all levels, including their participation in professional networks and associations that foster such cooperation and international exhibitions, exchanges and the mobility of collections.

32. The collections defined in paragraph 5, when held in institutions that are not museums, should be protected and promoted in order to preserve the coherence and better represent the cultural diversity of those countries’ heritage. Member States are invited to cooperate in the protection, research and promotion of those collections, as well as in promoting access to them.

33. Member States should take appropriate legislative, technical, and financial measures, in order to design public planning and policies enabling the development and implementation of these recommendations in museums situated in the territories under their jurisdiction.

34. In order to contribute to the improvement of museum activities and services, Member States are encouraged to support the establishment of inclusive policies for audience development.

35. Member States should promote international cooperation in capacity building and professional training, through bilateral or multilateral mechanisms including through UNESCO, in order to better implement these recommendations and especially to benefit the museums and collections of developing countries.

ANNEX V  RECOMMENDATION CONCERNING THE PRESERVATION OF, AND ACCESS TO, DOCUMENTARY HERITAGE INCLUDING IN DIGITAL FORM

PREAMBLE

The General Conference of the United Nations Educational, Scientific and Cultural Organization, meeting in Paris from 3 to 18 November 2015, at its 38th session,

Considering that documents produced and preserved over time, in all their analogue and digital forms through time and space, constitute the primary means of knowledge creation and expression, having an impact on all areas of humanity's civilization and its further progress,

Also considering that documentary heritage records the unfolding of human thought and events, the evolution of languages, cultures, peoples and their understanding of the world,

Underlining the importance of documentary heritage to promote the sharing of knowledge for greater understanding and dialogue, in order to promote peace and respect for freedom, democracy, human rights and dignity,

Noting that the evolution of documentary heritage enables intercultural education and personal enrichment, scientific and technological progress and is a crucial resource for development,

Recognizing that the history and culture which exist in the form of documentary heritage may not be conveniently accessible,

Recognizing also that over time considerable parts of documentary heritage have disappeared due to natural or human disasters or are becoming inaccessible through rapid technological change, and underlining that lack of legislation impedes memory institutions to counter irreversible loss and impoverishment of that heritage,

Recalling that, in response to this challenge, UNESCO established the Memory of the World Programme in 1992 to increase awareness and protection of the world's documentary heritage, and to provide for its universal and permanent accessibility,

Taking into account the rapid evolution of technology, and the challenge of establishing models and processes for preserving digital heritage objects including complex ones, such as multi-media works, interactive hypermedia, online dialogues and dynamic data objects from complex systems, mobile content and future emerging formats,

Also taking into account the international standard-setting instruments and other relevant treaties and statements, as listed in the Appendix,

Bearing in mind the need for States, communities and individuals to take appropriate measures for the protection, preservation, accessibility and enhancement of the value of documentary heritage,

Having decided at its 37th session that this question should be the subject of a Recommendation to Member States,

Adopts, on this seventeenth day of November 2015, the present Recommendation:

DEFINITIONS

For the purposes of this Recommendation, a document is an object comprising analogue or digital informational content and the carrier on which it resides. It is preservable and usually moveable. The content may comprise signs or codes (such as text), images (still or moving) and sounds, which can be copied or migrated. The carrier may have important aesthetic, cultural or technical qualities. The relationship between content and carrier may range from incidental to integral.

Documentary heritage comprises those single documents – or groups of documents – of significant and enduring value to a community, a culture, a country or to humanity generally, and whose deterioration or loss would be a harmful impoverishment. Significance of this heritage may become clear only with the passage of time. The world's documentary heritage is of global importance and responsibility to all, and should be fully preserved and protected for all, with due respect to and recognition of
cultural mores and practicalities. It should be permanently accessible and re-usable by all without hindrance. It provides the means for understanding social, political, collective as well as personal history. It can help to underpin good governance and sustainable development. For each State, its documentary heritage reflects its memory and identity, and thus contributes to determine its place in the global community.

**Memory institutions** may include but are not limited to archives, libraries, museums and other educational, cultural and research organizations.

1. **IDENTIFICATION OF DOCUMENTARY HERITAGE**

1.1 Member States are encouraged to support their memory institutions in establishing selection, collection and preservation policies by research and consultation, guided by internationally established and defined standards regarding documentary heritage in their territories. The documents, fonds and collections should be managed in a way that ensures their preservation and accessibility over time, and assigns means of discovery, including cataloguing and metadata.

1.2 Policies, mechanisms and criteria for selecting, acquiring and de-selecting documentary heritage should be developed by memory institutions in coordination with civil society, taking into account not only key documents but also their contextual material, including social media. Selection criteria must be non-discriminatory and clearly defined. Selection must also be neutrally balanced with respect to knowledge fields, artistic expressions and historic eras. Because of their inherently temporary nature, decisions concerning the preservation of digital documents may need to be made at or before the time of creation.

1.3 Member States are encouraged to identify specific documentary heritage the survival of which is at potential or imminent risk, and draw it to the attention of competent bodies able to take appropriate preservation measures. They should support and strengthen their relevant memory institutions and, where practical and appropriate, encourage research communities and private owners to care for their own documentary heritage in the public interest. Similarly, public and private institutions should ensure professional care for the documents which they themselves create.

1.4 Member States should encourage the identification and nomination of significant documentary heritage to national, regional or international Memory of the World Registers as a means of raising awareness.

1.5 Member States are invited to develop training and capacity-building schemes as appropriate to ensure the identification, preservation and access to documentary heritage.

2. **PRESERVATION OF DOCUMENTARY HERITAGE**

2.1 Preservation of documentary heritage means encompassing techniques, treatments, procedures and technologies of any nature, preventive and remedial, aiming at the preservation of the documents and of the information contained therein.

2.2 Preservation is an ongoing process requiring the management of both analogue and digital objects and can be enhanced by scholarship, technology and science. Analogue carriers should be retained where they have continuing value as authentic originals, artefacts or information bearing objects. In the case of digital documents, action and intervention are desirable from before the point of creation and acquisition, in order to optimize further management, minimize costs and to properly manage the risks involved. Cooperation should be further encouraged among governments, memory institutions and the private sector.

2.3 In pursuing measures of preservation, integrity, authenticity and reliability should be the guiding principles. Concrete measures and actions should follow the international legislation and the recommendations, guidelines, best practices and standards developed or supported by memory institutions. The Memory of the World Programme, should provide a platform to promote standards and share best practices.

2.4 Member States are encouraged to develop awareness-raising and capacity-building measures and policies as a key component of preservation, including promoting research as well as training for documentary heritage professionals and providing facilities for such. These should embrace curatorial best practices, current and emerging technologies, forensic skills and core competencies in relevant scholarship, science, technology and engineering, thereby raising awareness of the urgency of timely preservation action in a constantly changing environment.

2.5 The existence of possibly legitimate access restrictions on any part of the documentary heritage should not inhibit or limit the ability of memory institutions to take preservation action. Member States are invited to take this consideration into account while implementing this recommendation and through updating their relevant domestic legislation.

2.6 Member States that hold in their memory institutions collections originating in or of relevance to other States are encouraged to share digital programmes and copies of such heritage with the Parties concerned.

2.7 Member States should encourage consistency of best practice and preservation standards across memory institutions, including risk management, such as the degradation and theft of documents, and investment in appropriate technical infrastructure. This may include nationwide coordination and sharing of tasks among memory institutions, based on their existing roles, strengths and responsibilities.

2.8 Member States are encouraged to support memory institutions’ participation in the development of international standards for preservation. Member States are further invited to encourage memory institutions to link with the appropriate professional associations to both enhance and share their technical knowledge, and contribute to the ongoing development of international standards.

2.9 Member States are invited to support the development of academic curricula for digital preservation, as well as networking activities at national, regional and international levels for more effective implementation of the Memory of the...
3. ACCESS TO DOCUMENTARY HERITAGE

3.1 Member States are encouraged to provide appropriate legislative frameworks for memory institutions and ensure their necessary independence in preserving and providing access to documentary heritage, so as to sustain public trust in the scope of material selected, and the way in which it is preserved. The provision of access is visible evidence and justification of public expenditure on preservation.

3.2 Member States are urged to promote and facilitate maximum inclusive access to, and use of, documentary heritage by empowering memory institutions to provide accurate and up-to-date catalogues and finding aids, equitable person-to-person access services to the original documents, if necessary for research, Internet and web-based publications and portals, electronic and digitized content, using international best practice standards. Member States are further encouraged to support memory institutions in the development of international standards for access and use, using recognized standards that support interoperability. Whenever possible, content should be structured, machine-readable and linkable.

3.3 The avenues for providing access to documentary heritage are multiplying through the growth of information and communication technologies and the development of global networks among memory institutions and their partners. Member States should encourage and support the development of outreach programmes, including exhibitions, travelling presentations, radio and television programmes, publications, consumer products, online streaming, social media, lectures, educational programmes, special events and the digitization of content for downloading.

3.4 Programmes for access to documentary heritage may be facilitated by partnerships, including public-private ones. Member States are invited to encourage such arrangements if they are responsible and equitable.

3.5 Where restrictions to accessing documentary heritage are necessary to protect privacy, human safety, security, confidentiality or for other legitimate reasons, they should be clearly defined and stated and be of limited duration. They should be underpinned by appropriate national legislation or regulation by including an appeals mechanism against such decisions.

3.6 When updating or enacting new legislation which impacts on access to documentary heritage, Member States should consider the need to maximize such access while respecting the legitimate interests of the rights-holders. Member States are encouraged to extend this public access to countries with which they have shared a historical documentary heritage.

3.7 Member States are invited to enhance the visibility and accessibility of their documentary heritage through the outreach activities and publications of the Memory of the World Programme as appropriate, with investment in digitization of content for access purposes now being one of its key components. Member States should support and promote public domain access, and wherever possible, encourage the use of public licensing and open access solutions.

4. POLICY MEASURES

4.1 Member States are urged to consider their documentary heritage as an invaluable asset and to apply this perspective in national legislation, development policies and agendas. They are further encouraged to recognize the long-term need for new investment in the preservation of different types of originals in analogue format, in digital infrastructure and skills, and to adequately endow memory institutions.

4.2 At the same time, in the context of their national heritage policies, Member States are encouraged to take a global view of the needs of memory institutions, beyond the practicalities of infrastructure, and encourage logical partnerships and cost sharing with other entities in setting up shared facilities, processes and services.

4.3 Private and local institutions and individuals holding valuable collections need public encouragement and support as well as adequate visibility in national directories.

4.4 Member States should improve access to documentary heritage by encouraging the development of new forms and tools of education and research on documentary heritage and their presence in the public domain.

4.5 Through legislation and policy, Member States are encouraged to create a participatory approach a stable, enabling environment that will give incentives to sponsors, foundations and other external parties to support memory institutions and, with them, to invest in the preservation, accessibility and use of documentary heritage in the public interest.

4.6 Member States are encouraged to periodically review copyright codes and legal deposit regimes to ensure they are fully effective, with limitations and exceptions, for preserving and accessing documentary heritage in all its forms. Effectiveness would also profit from the strengthening and harmonization of legislation and alignment of policies among Member States.

4.7 Where preserving and accessing documentary heritage requires the use of software or other proprietary technology not covered by copyright exceptions, Member States are invited to facilitate access to proprietary codes, keys and unlocked versions of technology on a non-profit basis.

4.8 In order to facilitate optimal exchange of data, Member States should encourage the development and use of internationally recognized open source software and standardized interfaces for managing digital documentary heritage, and seek the cooperation of software and hardware developers in extracting data and content from proprietary technologies. Likewise, their memory institutions should aim for international standardization and interchangeability of cataloguing methods and standards.
4.9 Member States are invited to support and develop policies and initiatives affecting documentary heritage, including monitoring the status of documentary heritage inscribed on the Memory of the World Registers.

4.10 Member States are encouraged to contribute building synergies between the Memory of the World Programme and other heritage programmes in order to assure further coherence of actions.

5. NATIONAL AND INTERNATIONAL COOPERATION

5.1 In view of the need to intensify national and international cooperation and exchanges, in particular through the pooling of human and material resources to assist research and the protection and preservation of documentary heritage, Member States should support the exchange of research data, publications, and information; the training and exchange of specialist personnel and equipment. They should promote the organization of meetings, study courses and working groups on particular subjects, such as cataloguing, risk management, identification of endangered documentary heritage and modern research.

5.2 Member States should encourage cooperation with international and regional professional associations, institutions and organizations concerned with documentary heritage preservation and access, with a view to implementing bilateral or multilateral research projects and publishing guidelines, policies and best practice models.

5.3 Member States are invited to facilitate the exchange between countries of copies of documentary heritage that relate to their own culture, shared history or heritage, and of other identified documentary heritage, in particular due to their shared and entangled historical nature or in the framework of the reconstitution of dispersed original documents, as appropriate, which has been the object of preservation work in another country. The exchange of copies will have no implications on the ownership of originals.

5.4 To the best of their ability, Member States should take all appropriate measures to safeguard their documentary heritage against all human and natural dangers to which it is exposed, including the risks deriving from armed conflicts. Likewise, they should refrain from acts likely to damage documentary heritage or diminish its value or impede its dissemination or use, whether it is to be found on the territory of one Member State or on the territory of other States.

5.5 Member States are encouraged to engage in international cooperation to safeguard endangered documentary heritage through digitization or other means following a request made by another Member State.

5.6 Member States are invited to strengthen their cooperation with the Memory of the World Programme through their memory institutions by establishing national Memory of the World committees and registers, when deemed appropriate.

***

The General Conference recommends that Member States should apply the above provisions concerning the preservation of and access to documentary heritage by taking whatever legislative or policy measures or other steps that may be required, in conformity with the constitutional practice of each State, to give effect, within their respective territories to the principles, measures and norms set forth in this Recommendation.

The General Conference recommends that Member States bring this Recommendation to the attention of the appropriate authorities and bodies.

The General Conference recommends that Member States should report to it, by the dates and in a manner to be determined by it, on the action they have taken to give effect to this Recommendation.
